**EXHIBIT A
To Security Agreement**

PATENT AGREEMENT

THIS PATENT AGREEMENT ("Agreement") dated as of October 31, 2013, and entered into by and between **PYNG MEDICAL CORP.**, a company under the Business Corporations Act of British Columbia, and **PYNG MEDICAL USA CORP.** (collectively, "Debtor"), and **DONATELLE PLASTICS, INCORPORATED**, a corporation organized under the laws of the State of Minnesota, (the "Lender").

WITNESSETH

WHEREAS, pursuant to that certain Promissory Note, dated as of October 1, 2013, between Debtor and Lender thereto (the "Promissory Note" and, together with all other documents and instruments related thereto, the "Transaction Documents"), has agreed to the following terms.

WHEREAS, in connection with the Notes, Debtor has executed and delivered a Security Agreement, dated as of the date hereof (together with all amendments and other modifications, if any, from time to time thereafter made thereto, the "Security Agreement");

WHEREAS, Debtor has agreed to execute and deliver this Agreement and to grant to the Lender a continuing security interest in all of the Patent Collateral (as defined below) to secure all the Secured Obligations; and

WHEREAS, Debtor has duly authorized the execution, delivery and performance of this Agreement;

NOW, THEREFORE, in consideration of the promises herein and in order to induce the Lender to purchase the Notes and for other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, Debtor hereby agrees with the Lender as follows:

1. Definitions

Unless otherwise defined herein or the context otherwise requires, terms used in this Agreement, including its preamble and recitals, have the meanings provided in the Security Agreement.

2. Grant of Security Interest

For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, to secure all of the Secured Obligations, Debtor does hereby mortgage, pledge and hypothecate to the Lender, and grant to the Lender, for its benefit and the benefit of the

Lender, a security interest in all of Debtor's right, title and interest in and to the following property (the "Patent Collateral"), whether now owned or hereafter acquired or existing:

- (a) all letters patent and applications for letters patent throughout the world, including all patent applications in preparation for filing anywhere in the world and including each patent and patent application referred to in Attachment I hereto;
- (b) all patent licenses, including any patent licenses referred to in Attachment I hereto;
- (c) all reissues, divisions, substitutions, conversions, continuations, continuations-in-part, extensions, renewals and reexaminations of any of the items described in the foregoing clauses (a) and (b); and
- (d) all proceeds of, and rights associated with, the foregoing, including: license royalties; proceeds of infringement and/or unfair competition lawsuits; the right to sue, or any claim by Debtor against, third parties for past, present or future infringements of any patent or patent application (including any patent or patent application referred to in Attachment I hereto) and for breach or enforcement of any patent license (including any patent license referred to in Attachment I hereto); and all rights corresponding thereto throughout the world.

3. **Security Agreement**

This Agreement has been executed and delivered by Debtor for the purpose of registering the security interest of the Lender in the Patent Collateral with the United States Patent and Trademark office and corresponding offices in other countries of the world. The security interest granted hereby has been granted as a supplement to, and not in limitation of, the security interest granted to the Lender under the Security Agreement. The Security Agreement (and all rights and remedies of the Lender thereunder) shall remain in full force and effect in accordance with its terms.

4. **Release of Security Interest.**

Upon payment in full of all Secured Obligations and the termination of all Commitments of that certain Promissory Note, dated October 1, 2013, the Lender shall, at Debtor's expense, execute and deliver to Debtor all instruments and other documents as may be necessary or proper to release the lien on and security interest in the Patent Collateral which has been granted hereunder.

5. **Acknowledgment**

Debtor does hereby further acknowledge and affirm that the rights and remedies of the Lender with respect to the security interest in the Patent Collateral granted hereby are more fully set forth in the Security Agreement, the terms and provisions of which (including the remedies provided for therein) are incorporated by reference herein as if fully set forth herein.

6. **Loan Document, Etc.**

This Agreement is a Transaction Document executed pursuant to the Promissory Note and shall (unless otherwise expressly indicated herein) be construed, administered and applied in accordance with the terms and provisions of the Promissory Note.

7. **Counterparts**

This Agreement may be executed by the parties hereto in several counterparts, each of which shall be deemed to be an original and all of which shall constitute together but one and the same agreement.
