THIS ASSIGNMENT AND ASSUMPTION AGREEMENT ("Agreement") is effective as of the 27th day of June 2013, by and between **ACACIA RESEARCH GROUP LLC**, a Texas limited liability company having a place of business at 2400 Dallas Parkway, Suite 200, Plano, Texas 75093 USA ("Assignor") and **CELLULAR COMMUNICATIONS EQUIPMENT LLC**, a Texas limited liability company having a place of business at 2400 Dallas Parkway, Suite 200, Plano, Texas 75093 USA ("Assignee").

WHEREAS, Assignor and **Nokia Siemens Networks Oy** ("NSN") are parties to an Assignment (the "Assignment Document") effective December 21, 2012 pursuant to which NSN granted Assignor an option to select up to five patent families as provided in the Assignment Document (collectively the "Patent Families" and each individually a "Patent Family") where upon Assignor's selection of such Patent Family or Patent Families, NSN agreed to sell, assign, transfer and set over to Assignor, such Patent Family or Patent Families, including without limitation, all rights of NSN to sue for past, present and future infringement of such Patent Family or Patent Families, including the right to collect and receive any damages, royalties, or settlements for such infringements, all rights to sue for injunctive or other equitable relief, and any and all causes of action relating to any of the inventions or discoveries described in the patents of such Patent Family or Patent Families, and all goodwill in connection with the foregoing.

WHEREAS, Assignor selected the Patent Family listed in the Exhibit attached hereto including all patents, patent applications, foreign patents, foreign patent applications, continuations, continuations-in-part, divisionals, extensions, renewals, reissues and reexaminations related to all inventions thereof (the "Patents");

WHEREAS, on June 24, 2013, NSN did sell, assign, transfer and set over to Assignor, the Patents, including without limitation, all rights of NSN to sue for past, present and future infringement of the Patents, including the right to collect and receive any damages, royalties, or settlements for such infringements, all rights to sue for injunctive or other equitable relief, and any and all causes of action relating to any of the inventions or discoveries described in the Patents, and all goodwill in connection with the foregoing.

WHEREAS, Assignor wishes to assign its entire rights, obligations, interests and liabilities in the Assignment Document to Assignee in connection with the Patents; and

WHEREAS, Assignee agrees to assume such rights, obligations, interests and liabilities of Assignor under the Assignment Document in connection with the Patents.

NOW THEREFORE, in consideration of the foregoing, the parties agree as follows:

1. Assignor hereby does transfer and assign unto Assignee all of Assignor's rights, obligations, interests and liabilities under the Assignment Document as such rights, obligations, interests and liabilities relate to the Patents including, without limitation, the entire right, title, and interest in and to the Patents (and all patents, patent applications, foreign patents, foreign patent applications, continuations, continuations-in-part, divisionals, extensions, renewals, reissues and reexaminations related to all inventions thereof), including all rights to sue for past, present and future infringement of the Patents, the right to collect and receive any damages, royalties, or settlements for such past, present and future infringements, all rights to seek and obtain injunctive or other equitable relief, and any and all causes of action relating to any of the inventions or discoveries described in the Patents.

2. For and in consideration of the assignment hereunder, Assignee hereby assumes all of Assignor's rights, obligations, interests and liabilities under the Assignment Document as such rights, obligations, interests and liabilities relate to the Patents to the same extent as though it had originally been named as a party thereto and agrees to observe, perform and fulfill all the terms and conditions of the Assignment Document as the terms and conditions relate the Patents, including without limitation the payment obligations, to the same extent as if it had been originally named as a party thereto.
3. This Agreement shall be binding upon and inure to the benefit of the parties and their respective successors and assigns.
