(formerly Viamet Pharmaceuticals, Inc.), a Delaware corporation ("Assignor"), hereby assigns to VPS-1, Inc., a Delaware corporation having a place of business at 4505 Emperor Blvd., Suite 300, Durham, NC 27703 ("Assignee"), all of Assignor's right, title and interest in and to the below-identified patents and patent applications, including but not limited to corresponding non-provisional/utility, continuations, divisionals, reissues, reexaminations, extensions, and substitutions of said application(s) and such patents and counterparts thereof in any country of the world ("Patent Rights"), including all rights to sue for past infringement, the same to be held and enjoyed by Assignee, its successors and assigns, in and throughout the United States of America, its territories and possessions and all foreign countries, including but not limited to all of Assignor's right, title and interest in and to the invention(s) described in said Patent Rights and in such letters patent as may issue from patent applications included within the Patent Rights; said Patent Rights to be held and enjoyed by said Assignee for its own use and behalf and for its successors, assigns and legal representatives, to the full end of the term for which said letters patents may be granted as fully and entirely as the same would have been held by Assignor had this assignment and sale not been made. AND, Assignor hereby further agrees for ourselves and our executors and administrators to execute upon request any other lawful documents and likewise to perform any other lawful acts which may be deemed necessary or desirable to secure more fully the aforesaid assignment of Patent Rights and invention(s) to said Assignee, its successors, assigns, and legal representatives, including the execution of corresponding non-provisional/utility, substitution, continuation, divisional, reissue, reexamination, extension and corresponding foreign or international patent applications;

AND, Assignor hereby further agrees to provide factual statements or testimony in any interference, reissue, reexamination, inter partes review, post grant review or any other proceeding in which said invention(s) or any application or patent directed thereto may be involved;
