Accordingly, the parties agree as follows:

1. Assignors hereby convey and assign to Assignee, and Assignee accepts, Assignors' entire right, title and interest in and to the Patents and Applications and the inventions disclosed therein, including any and all continuation, continuation-in-part and divisional applications and any and all continuing prosecution applications based in whole or in part on the Patents and Applications or on which the Patents and Applications are based in whole or in part, and including all patents, as well as reexaminations and reissues thereof resulting from the Patents and Applications, and including the right to claim priority to any and all of the Patents and Applications in any pending or later filed continuation, continuation-in-part, divisional reexamination, or reissue application.
