THIS PATENT ASSIGNMENT (this "**Assignment**") is entered into as of this 31st day of October, 2014 (the "**Effective Date**") by and between Vibro/Dynamics Corporation, an Illinois corporation ("**Assignor**"), and Socitec Industry LLC, an Illinois limited liability company ("**Assignee**").

WHEREAS, Assignor is the owner of all right, title and interest in and to the patents listed on the attached **Schedule A**, including, but not limited to, all rights directly or indirectly related to the inventions, trade secrets or other intellectual property related thereto (collectively, the "**Intellectual Property**").

WHEREAS, Assignor desires to transfer and assign to Assignee, and Assignee desires to accept the transfer and assignment of, all right, title, and interest in, to and under the Intellectual Property in and throughout the United States of America, its territories and all foreign countries, including the right to claim priority under United States law, any applicable foreign country's law, or international convention, and all provisionals, non-provisionals, continuations, continuations-in-part, divisionals, reissues, reexaminations, renewals, substitutes and extensions of any of the foregoing.

NOW, THEREFORE, as of the Effective Date written above, Assignor, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, does hereby transfer and assign to Assignee, and Assignee hereby accepts the transfer and assignment of, all right, title, and interest in, to, and under the Intellectual Property in and throughout the United States of America, its territories and all foreign countries, including the right to claim priority under United States law, any applicable foreign country's law, or international convention, and all provisionals, non-provisionals, continuations, continuations-in-part, divisionals, reissues, reexaminations, renewals, substitutes and extensions of any of the foregoing, and all applications for industrial property protection, including, without limitation, all applications for patents, utility models, and designs which have already been and which may hereafter be filed for the Intellectual Property in any country or countries foreign to the United States, together with the right to file such applications and the right to claim for the same the priority rights derived from the patent under the patent laws of the United States, the International Convention for the Protection of Industrial Property, or any other international agreement or the domestic laws of the country in which any such application is filed, as may be applicable; and all forms of industrial property protection, including, without limitation, patents, utility models, inventors' certificates and designs which may be granted for said Intellectual Property in any country or countries foreign to the United States and all extensions, renewals and reissues thereof, together with all rights to sue for and collect damages and costs for all past, present and future infringements, whether arising prior to or subsequent to the date of this Assignment, the same to be held and enjoyed by the Assignee, its successors and assigns, from and after the Effective Date above, as fully and entirely as the same would have been held and enjoyed by Assignor had this Assignment not been made.

IN ADDITION, Assignor covenants and agrees, at Assignor's cost, to execute or cause execution of any further assurance of title to any of the Intellectual Property or inventions described therein, and to, upon the request of Assignee deliver, or cause to be delivered, and execute, or cause to be executed, all papers that may be necessary or desirable to perfect the title to said inventions or any Intellectual Property which may be granted therefore in Assignee, its successors, assigns or any other legal representatives.
