ASSIGNMENT

Whereas **NeuroSigma, Inc.** ("Assignor") recognizes that the original assignment of the patents and patent applications described in Attachment A by Alejandro Covalin to NeuroSigma was defective in that Alejandro Covalin had assigned the entire right and interest in the invention captured by the provisional patent application described in Attachment A to NeuroSigma but that subsequently it became clear that Alejandro Covalin did not have the right to assign the entire right and interest in the invention in that the subsequent non-provisional application and issued U.S. patent described in Attachment A that were directed to the same invention included a co-inventor Antonio DeSalles who was obligated to assign his rights in the invention to the Regents of the University of California, and whereas NeuroSigma wishes to clarify that title for the patents and patent applications described in Attachment A does not lie with NeuroSigma in light of the defective assignment by Alejandro Covalin to NeuroSigma, NeuroSigma hereby assigns and transfers any remaining rights in the invention captured by the patent applications and patents described in Attachment A as obtained from Alejandro Covalin ("Covalin's Rights") (to the extent that there are any such rights) to **Alejandro Covalin** ("Assignee"), and its successors and assigns.

NOW, WHEREFORE, to all whom it may concern, be it known that Assignor has assigned, and transferred, and by these presents does assign and transfer unto said Assignee, and its successors or assigns, the right, title and interest in the Covalin Rights for all countries in and to all inventions and improvements disclosed in the aforesaid patents and patent applications, and in and to the said applications, all divisions, continuations, continuations-in-part, or renewals thereof, all Letters Patents which may be granted there from, and all reissues or extensions of such patents, and in and to any and all applications which have been or shall be filed in any foreign countries for Letters Patent on the said inventions and improvements, including an assignment of all rights under the provisions of the International Convention, and all Letters Patents of foreign countries which may be granted there from; and Assignor does hereby authorize and request the Commissioner of Patents and Trademarks to issue any and all United States Letters Patents for the aforesaid inventions and improvements to said Assignee, and its successors and assigns.

IN TESTIMONY WHEREOF, I have hereunto set my hand this 12th day of November, 2014.

NeuroSigma, Inc.

Dr. Leon Ekchian
President

Attachment A

U.S. Provisional Application No. 61/039,671

U.S. Patent No. 8,257,684
