I/We:

ZHANPENG JIN, 4140 Marietta Drive, Vestal, NY 13850; and

SARAH LASZLO, 1008 Vestal Ave, Binghamton, NY 13903

(hereinafter "Assignors") hereby sell, assign, and transfer, and agree in the future to sell, assign, and transfer, unto The Research Foundation for The State University of New York, (hereinafter "Assignee"), located at P.O. Box 6000, Binghamton, New York 13902-6000, its successors, assigns and designees,

the entire right, title, and interest in and to, and any right I now have or have ever had or will have in our application for Letters Patent of the United States and to any information disclosed in or referenced by Binghamton University Technology Disclosure RB-439.1, entitled:

WEARABLE HEAD-MOUNTED, GLASS-STYLE COMPUTING DEVICES WITH EOG ACQUISITION AND ANALYSIS FOR HUMAN-COMPUTER INTERFACES

which claims benefit of priority from U.S. Provisional Patent Application No. 61/900,397, filed November 5, 2013,

and acknowledge the ownership by Assignee of such right by virtue of The Patents and Inventions Policy of the State University of New York, 8 NYCRR Title J, § 335.28, and our entire right, title, and interest in and to all our Technology Disclosure and inventions, whether joint or sole, disclosed in said Application for Letters Patent, to any inventions made in conjunction with the work described in the Technology Disclosure, and/or disclosure of the Application for Letters Patent, or made using the facilities of the State University of New York or Assignee, any copyright with respect to any disclosure and in the Technology Disclosure (to the extent permitted under 8 NYCRR Title J, § 335.29 Copyright Policy), and our entire right, title, and interest in and to all provisional patent applications, regular utility applications, design patent applications, divisional or continuation applications, continuation-in-part applications, reissue patent applications, or applications for reexamination that may be filed for or relating to any United States Letters Patent for any of said inventions or relating to the Technology Disclosure, and any patent or patent application inside or outside the United States claiming direct or indirect benefit of priority of this application or any other application assigned herein, and in and to all patents or other enforceable intellectual property rights that may be granted on or from the foregoing applications, and the sole right to claim benefit of priority from any of the foregoing in the United States or in foreign countries, and all right title and interest in any patent which may issue respecting such priority claim (hereinafter "The Assigned Rights").

I/We agree that Assignee shall have the authority and power to prosecute any such applications in its own name, and to transfer or delegate any such rights without further consent from us,

I/We hereby agree, whenever requested, to communicate to said assignee, its successors and assigns, any facts known to us respecting said inventions or applications, to cooperate fully in obtaining and enforcing any such patents, and to execute all applications or papers necessary to obtain and maintain proper patent protection on said inventions.

I/We grant to Assignee and its agents a Power of Attorney to insert on this Document any further identification which may be necessary or desirable in order to comply with the rules of the United States Patent and Trademark Office for recordation of this document.

I/We hereby warrant and represent that Assignors have the right to transfer the entire right, title and interest in the foregoing to Assignee free of encumbrances, and do hereby transfer that right, title and interest to Assignee, and otherwise waive any rights I/We may have as inventors, including any economic rights (except that amount provided as an Inventor's Share of under 8 NYCRR Title J, § 335.28(c) Patents and Inventions Policy) and any reversionary rights, in any jurisdiction, to the extent permitted by law. I/We also transfer any and all right to sue, in Assignee's own name, for infringement of any patents which result from any such patent applications, and to collect damages, fees, and expenses, for any such infringement, past, present, or future, without any reporting or accounting to me/us.
