PATENT ASSIGNMENT

This Patent Assignment ("Assignment") is made by PRONAMIC INDUSTRIES, LLC, a North Carolina limited liability company, having a principal office address of 1151 Page Road, Washington, NC 27889 ("Assignor"), to DELSTAR ELECTROSTATIC, INC., a Delaware corporation, having a principal office address of 100 North Point Center East, Suite 600, Alpharetta, GA 30022 ("Assignee").

WHEREAS, Assignor owns certain intellectual property relating to air filtration technology and related materials ("Intellectual Property"); and,

WHEREAS, Assignor has invented, or is the owner of the entire right and title in, to and under the patents and patent applications as identified in Schedule A attached and made a part of this Assignment, the patents and/or patent applications relating to the foregoing Intellectual Property (the "Patent Rights"); and,

WHEREAS, Assignor desires to assign the entire right, title, and interest in and to the Intellectual Property and the Patent Rights, to Assignee; and,

WHEREAS, Assignee desires to acquire the entire right, title, and interest in and to the Intellectual Property and the Patent Rights, from Assignor.

NOW, THEREFORE, be it known that for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor by these presents does hereby sell, assign, transfer, and convey unto the Assignee, its successors and assigns, the entire right, title, and interest in and to the Intellectual Property and the Patent Rights, and in any improvements on the Intellectual Property previously or in the future made or acquired by Assignor, and to all rights of priority to the same pursuant to the International Convention for the Protection of Industrial Property, and in and to any and all foreign patent applications filed based on the Intellectual Property or the Patent Rights, and in and to any and all continuations, continuations-in-part, or divisions of any United States or foreign patent application filed on the Intellectual Property or the Patent Rights, and in and to any and all Letters Patent of the United States of America and all foreign countries or reissues thereof which may be granted therefor or thereon, for the full end of the term for which said Letters Patent may be granted, the same to be held and enjoyed by said Assignee, its successors and assigns, as fully and entirely as the same would have been held and enjoyed by Assignor if this assignment and sale had not been made.

Assignor further warrants and represents that, at the time of the execution and delivery of these presents, Assignor possesses its full title to the Intellectual Property and the Patent Rights, and that it has the unencumbered right and authority to make this assignment.

Assignor further covenants and agrees, and likewise binds, its legal representatives, successors, and assigns, to promptly communicate to said Assignee or its representatives any facts known to it relating to said Intellectual Property or Patent Rights, to testify in any interference or legal proceedings involving the same, to execute any additional papers which may be requested to confirm the right of the Assignee, its representatives, successors, and assigns to secure patent or similar protection for said Intellectual Property and Patent Rights in all countries and to vest in the Assignee complete title to the Intellectual Property and Patent Rights and Letters Patent, without further compensation, but at the expense of said Assignee, its successors, assigns, and other legal representatives.
