ASSIGNMENT OF RIGHTS

This ASSIGNMENT OF RIGHTS (this "*Assignment*") is made effective as of October 31, 2014 (the "*Effective Date*") by and between Analog Devices Technology, a private unlimited company incorporated in Ireland and tax resident in Bermuda, with registered number 520169 and having its registered office at Bay F1 Raheen Industrial Estate, Limerick ("*AD Tech*") and Analog Devices Global, a private unlimited company incorporated in Ireland and tax resident in Bermuda, with registered number 547543 and having its registered office at Bay F1 Raheen Industrial Estate, Limerick ("*AD Global*").

WHEREAS, AD Tech owns certain Intellectual Property (as defined below); and

WHEREAS, AD Tech wishes to transfer AD Tech's entire right, title and interest in and to such Intellectual Property to AD Global for no consideration.

NOW THEREFORE, in consideration of the mutual agreements and covenants set forth herein and other good and valuable consideration, the receipt and adequacy of which is hereby acknowledged, and intending to be legally bound hereby, the parties agree as follows:

1. Certain Definitions.

(a) "*Intellectual Property*" means all IP Rights, Know-How, and related intangibles.

(b) "*IP Rights*" means any patent, copyright, mask work, or utility model, any application or registration for any patent, copyright, mask work or utility model, or any substitution, divisional, continuation, continuation-in-part, reissue, reexamination or extension (including supplementary protection certificate) of any of the foregoing, subsisting anywhere in the world.

(c) "*Know-How*" means all proprietary information relating to electronic device technology, including trade secrets, technical information and knowledge, including specifications, drawings, technical data and details of manufacturing processes, and all associated data, but excluding IP Rights.

2. AD Tech hereby assigns to AD Global all of AD Tech's right, title and interest in and to all Intellectual Property owned by AD Tech as of the Effective Date, including the right to seek and obtain damages for any past infringement of the IP Rights and/or any past misappropriation of the Know-How.

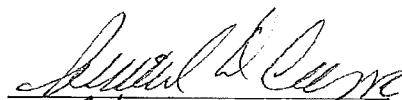

3. For clarity, the assignment under Paragraph 2 includes the sole right to file (a) substitutions, divisionals, continuations, continuations-in-part, reissues, reexaminations, extensions (including supplementary protection certificate) of and foreign counterparts to any of the IP Rights and (b) applications and/or registrations for any patent, copyright, mask work, utility model, trademark, and/or any other intellectual and/or industrial property right in respect of any of the Know-How, in each case ((a) and (b)) anywhere in the world (collectively "*Related Rights*").

4. AD Tech hereby authorizes and requests the United States Commissioner for Patents and any official of any country and/or countries foreign to the United States whose duty it is to issue patents and/or other evidence and/or forms of intellectual and/or industrial property protection on the IP Rights applications and the Related Rights to issue the same to AD Global, its successors, legal representatives and assigns.
5. AD Tech hereby represents and warrants that it has full right to convey the entire interests herein assigned, and that it has not executed, and will not execute, any agreement in conflict herewith.
6. AD Tech hereby covenants that it will communicate to AD Global, its successors, legal representatives and assigns, any facts known to AD Tech respecting the Intellectual Property and the Related Rights, testify in any legal proceeding, sign all lawful papers, make all rightful oaths, and generally do everything requested by AD Global to aid AD Global, its successors, legal representatives and assigns, to obtain full legal and beneficial title to, and enforce proper protection for, the Intellectual Property and the Related Rights anywhere in the world.
7. AD Tech hereby agrees that AD Global is the intended beneficiary of this instrument and may enforce its provisions against AD Tech.
8. This instrument shall be governed by and interpreted in accordance with the laws of the State of Delaware, without regard to any conflict of laws principles that would require the application of the laws of any other jurisdiction; provided, however, that any matter arising under this instrument that relates solely to a patent granted or patent application filed in a jurisdiction shall be governed by the laws of such jurisdiction applicable to such patent or patent application.
9. This instrument may be executed or accepted in any number of counterparts, each of which shall be deemed an original but all of which together shall constitute one and the same instrument.
