PATENT ASSIGNMENT

This Patent Assignment ("**Assignment**") is made as of this 2nd day of January 2015, by Karl Schumacher Dental Instrument Company, Inc., a Pennsylvania corporation ("**Assignor**"), to Karl Schumacher Dental, LLC, a Delaware limited liability company ("**Assignee**").

WHEREAS, Assignor owns the United States Letters Patent No. 6,309,219, issued October 30, 2001, set forth in United States Patent Application Serial No. 09/505,819, filed February 17, 2000, entitled "Periotome" (the "**Patent**"); and

WHEREAS, Assignee desires, and Assignor has agreed to assign to Assignee, the entire rights, title and interest in and to the Patent and the invention claimed therein, and all of Assignor's rights, title and interest in and to any and all United States and foreign patents relating to and/or claiming priority to said invention or the Patent, and all divisions, continuations, renewals, reissues, and extensions thereof, and all applications therefor, and the right to claim the priority of such patents in any and all foreign jurisdictions where any application for patent on said invention may be filed (collectively, "**Patent Rights**").

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor does hereby irrevocably assign and transfer to Assignee its entire rights, title and interest in and to the Patent and the Patent Rights, together with the right to prosecute and recover monetary damages for any and all past, present and/or future infringements and other violations of the Patent and/or Patent Rights. This Assignment expressly grants Assignee all rights in the Patent and Patent Rights as fully and entirely as the same would have been held and enjoyed by Assignor.

FURTHER, Assignor agrees to execute and provide, promptly after its execution hereof, such further instruments, documents and/or assignments as Assignee may reasonably request to effectuate the purposes of this transaction and to consolidate, vest and record in Assignee all rights in and to the Patent and Patent Rights.
