PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT ("Patent Assignment") is entered into and made effective as of November 16, 2012, by and between Pittards plc, a United Kingdom public limited company with a mailing address at Sherborne Road, Yeovil, Somerset, BA21 5BA, England ("Assignor") and Fownes Brothers & Co., Inc., a New York corporation with a mailing address at 16 East 34th Street, 5th Floor, New York, NY 10016 ("Assignee") (collectively referred to herein as the "Parties" and individually as a "Party").

WHEREAS, Assignor owns all right, title and interest in and to certain new and useful inventions and discoveries, for which a patent application has been filed entitled CONDUCTIVE LEATHER MATERIALS AND METHODS FOR MAKING THE SAME, the specification of which was filed as US Patent Application No. 13/568,869 on August 7, 2012 and having docket number FB0001US1 (the "Patent Rights");

WHEREAS, Assignor has the authority to and hereby does direct the assignment, transfer and conveyance of the Patent Rights to Assignee; and

WHEREAS, Assignee desires to acquire and to confirm the acquisition from Assignor, and Assignor desires to assign, transfer and convey, and to confirm the assignment, transfer and conveyance to Assignee, of all of Assignor's right, title and interest in and to the Patent Rights, on the terms and conditions set forth below.

NOW, THEREFORE, in consideration of good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

1. Assignment. Effective as of the date first written above, Assignor did and hereby does irrevocably assign, transfer, and convey and confirm the assignment, transfer and conveyance to Assignee of all of Assignor's right, title, and interest in and to the Patent Rights, including all inventions and discoveries encompassed thereby, all applications for Letters Patent of the United States of America, any and all other applications for Letters Patent on said inventions and discoveries in whatsoever countries, including all divisional, renewal, substitute, continuation, and Convention applications based in whole or in part upon the Patent Rights, said inventions or discoveries, or upon said applications, and any and all Letters Patent, reissues, and extensions of Letters Patent granted for said inventions and discoveries or upon said applications, and every priority right that is or may be predicated upon or arise from said inventions, said discoveries, said applications, said Patent Rights and said Letters Patent. Assignor has not

executed, and will not execute, any agreement, assignment, sale or encumbrance in conflict herewith.

2. Authorization. Assignor authorizes Assignee to file patent applications in any or all countries for any or all of said inventions and discoveries in Assignor's name or in the name of Assignee or otherwise as Assignee may deem advisable, under the International Convention or otherwise and authorizes and requests the Commissioner of Patents and Trademarks of the United States of America and the empowered officials of all other governments to issue or transfer all said Letters Patent to Assignee, as assignee of the entire right, title, and interest therein or otherwise as Assignee may direct.

3. Further Assurances. Assignor hereby agrees (all at assignee expense) to execute, or cause to be executed such additional documents, and to take such additional actions, as are reasonably requested by Assignee to continue, secure, defend, enforce and register the Patent Rights, and to otherwise give full effect to and to perfect the rights of Assignee under this Patent Assignment, including, without limitation:

(a) all documents necessary to record in the name of Assignee the assignment of the Patent Rights with the US Patent & Trademark Office, and with respect to any equivalent foreign rights, with any other appropriate patent office or registrar;

(b) reasonably cooperate with Assignee in its enforcement of the Patent Rights;

(c) supply all information and evidence of which Assignor has knowledge or possession relating to the making and practicing of the inventions and discoveries encompassed by the Patent Rights; and

(d) make available the Patent Rights' inventors to testify in any legal proceeding or to participate in meetings with Assignee's legal counsel.

4. Governing Law. This Patent Assignment shall be governed by, and construed in accordance with, the internal laws of the State of New York and the applicable federal laws of the United States of America pursuant to Title 15 of the United States Code.

5. Complete Agreement. This Patent Assignment constitutes the entire agreement and supersedes all other prior agreements and understandings, both written and oral, between the Parties with respect to an assignment of the Patent Rights.

6. Severability. In the event that any provision of this Patent Assignment conflicts with the law under which this Patent Assignment is to be construed, or if any such provision is held invalid by a court with jurisdiction over the Parties to this Patent Assignment, and the subject matter of this Patent Assignment, (i) such provision will be deemed to be restated to reflect as nearly as possible the original intentions of the Parties in accordance with applicable law, and (ii) the remaining terms, provisions, covenants and restrictions of this Patent Assignment will remain in full force and effect.

7. Waiver; Amendment. No waiver of any term, condition or obligation of this Patent Assignment shall be valid unless in writing and signed by the waiving Party. No failure or delay by either Party hereto at any time to require the other Party hereto to perform strictly in accordance with the terms hereof shall preclude such Party from requiring performance by the other Party hereto at any later time. No waiver of any one or several of the terms, conditions or obligations of this Patent Assignment, and no partial waiver thereof, shall be construed as a waiver of any of the other terms, conditions or obligations of this Patent Assignment. This Patent Assignment may not be amended, changed or modified in any fashion except by written instrument signed by each of the Parties hereto.

8. Headings. The headings contained in this Patent Assignment are for reference purposes only and shall not affect in any way the meaning or interpretation of this Patent Assignment.

9. Facsimile Signature; Counterparts. Facsimile or electronic transmission in portable document format of any signed original document or retransmission of any signed facsimile or electronic transmission in portable document format will be deemed the same as delivery of an original. This Patent Assignment may be executed in one or more counterparts, each of which when executed shall be deemed to be an original, but all of which shall constitute but one and the same agreement.

IN WITNESS WHEREOF, Assignor has caused this Patent Assignment to be executed by its officer thereunto duly authorized as of the date first set forth above.
