our Assignee, and to the successors and assigns of our Assignee, all our rights, title, and interest in and for the United States of America and all other countries, including all rights of priority, in and to the invention entitled:

TENSIONING AND CONNECTOR SYSTEMS FOR TETHERS

invented by us and described in an application for a United States patent, the specification of which was filed May 22, 2014, and received Application Number 14/360,259 and was executed on even date herewith, and in and to all United States patents which may be granted thereon and therefor, and in and to all divisions, continuations, reissued and re-examined patents, and to any extensions thereof, said interest being the entire ownership of the patent when granted, to be held and enjoyed by our Assignee, its successors, assigns or other legal representatives, to the full end of the term, terms, or any extension or renewal thereof, for which said patent or patents may be granted, as fully and entirely as the same would have been held and enjoyed by us if this assignment, sale, and conveyance had not been made;
