ASSIGNMENT

This ASSIGNMENT (the "Assignment") is made and entered into by and among: **Lee M. Amaitis** and **Howard W. Lutnick** (referred to hereinafter as "Assignors") and CFPH, LLC (hereinafter referred to as "Assignee"), a Delaware limited liability company, with an address of 110 East 59th Street, New York, NY 10022 (the Assignors and Assignee collectively referred to as the "Parties").

WHEREAS Assignors desire to assign to Assignee their entire right, title and interest in and to the Invention (as defined below), and Assignee desires to accept such right title and interest;

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency whereof is hereby acknowledged, each Assignor agrees as follows:

1. Invention Defined. As used in this Assignment, "Invention" shall mean the patent applications listed in **Exhibit A** and all inventions or discoveries disclosed or claimed therein, any improvements thereto, any non-provisional, continuation, division, renewal, extension, substitute, reexamination, reissue or continuation-in-part thereof, all treaty and convention rights and all rights of priority arising from the aforesaid applications, all applications claiming priority therefrom for the United States, or any other country, or any regional or international patent convention, all patents, utility models, invention registrations or any other form of legal protection issuing from any of the aforesaid, and all rights to sue for past, present, or future infringement under any of the aforesaid.

2. Assignment. Each Assignor hereby assigns and transfers to Assignee his entire right, title, and interest in and to the Invention.

3. Further Assurances. Each Assignor hereby covenants that Assignor shall communicate any improvements to the Invention as such arise, and shall, at the cost and expense of Assignee, take all actions and execute all documents necessary or desirable to establish inventorship, to perfect the interest of Assignee and/or its successors or assigns in and to the Invention, or to substantively prosecute or enforce the Invention, including but not limited to working with Assignee's representative(s) to prepare, review, execute, assign, and prosecute any and all patent applications, assignments, declarations, affidavits, or other lawful papers relating to the Invention and all related documentation, and do all lawful acts requisite for enforcing rights thereunder. Each Assignor covenants that Assignor shall not enter into any agreement, execute any assignment, or take any other action in conflict with this Assignment. Each Assignor hereby covenants (a) to communicate to Assignee any information known by Assignor that concerns the Invention and the history thereof, including all information material to patentability, promptly upon learning such information, (b) to testify in any legal proceeding relating to the Invention or this Assignment, and (c) generally to do all further acts that may be necessary or desirable to obtain or enforce proper patent protection for the Invention. Each Assignor shall promptly notify Assignee in the event Assignor receives actual notice of any claim that arises out of or is related to use of the Invention, and to cooperate with Assignee by making himself available at reasonable times and reasonable places to representatives of Assignee and its legal counsel.

4. Acknowledgement. Each Assignor hereby authorizes Assignee to make application for and to receive Letters Patent for the Invention in any country throughout the world in Assignor's or Assignee's name, at Assignee's election. Each Assignor hereby authorizes and requests that the competent authorities record this Assignment, and grant and

issue any and all patents included in the Invention to the Assignee as the assignee of all right, title and interest therein.

5. Representations and Warranties. Each Assignor represents and warrants that (a) Assignor has full power and authority to enter into this Assignment, (b) this Assignment has been duly authorized, executed and delivered by Assignor and constitutes the legal, valid and binding obligation of Assignor, enforceable against it in accordance with the terms hereof, (c) Assignor has not previously assigned any right or interest in the Invention to any third party, (d) Assignor is under no obligation to assign any right or interest in the Invention to any third party, and (e) entry into this Assignment does not breach any agreement between Assignor and any third party.

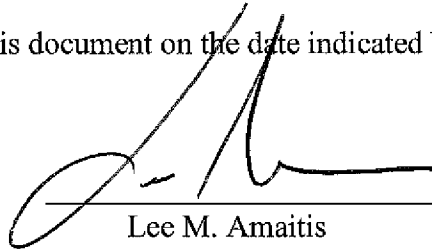

6. Successors. This Assignment shall be binding upon and inure to the benefit of the Parties hereto and to their respective successors and assigns.

7. Severability. If, for any reason, a court of competent jurisdiction finds any provision of this Assignment, or any portion hereof, to be unenforceable, such decision shall not affect the validity of the remaining portion, which remaining portion shall continue in full force and effect as if this Assignment had been executed with the invalid portion thereof eliminated therefrom. In the event that a portion of this Assignment shall be declared to be invalid, each Assignor shall enter into good faith negotiations with Assignee to replace such invalid provision with a valid provision as similar as possible to that which had been held to be invalid. In the event that the law of any jurisdiction limits the interest in the Invention that may be assigned, this Assignment shall be construed to transfer the greatest ownership interest, right to control prosecution, maintenance, and enforcement, and share of royalties and damages permitted by the law of such jurisdiction.
