## ASSIGNMENT OF PATENT

This Assignment of Patent ("Assignment") is entered into as of January 30, 2015 by Settled Solids Management, Inc., a Florida corporation with an address of 2107 Amelia Avenue, Sanford, FL 32771 ("Assignor") and Hydro International plc, a company formed under the laws of the United Kingdom with an address of Shearwater House, Clevedon Hall Estate, Victoria Road, Clevedon, BS21 7RD ("Assignee").

For One Dollar (\$1.00) and other valuable consideration, the receipt and sufficiency of which is hereby acknowledged by Assignor, Assignor hereby assigns, sells, grants and conveys to Assignee and its successors, assigns and designees, any and all of Assignor's rights, title, and interests throughout the world in the following inventions entitled:

Title:	Apparatus for Separating Solids from a Liquid
Patent No.:	US 7,074,339 B1
Issued:	July 11, 2006

including all property rights for other countries arising from the patent applications; any and all United States Letters Patent which may be issued on the aforesaid patent applications; and all reissues, renewals, divisions, continuations, continuations-in-part, or extensions of the patent applications and such Letters Patent; all reissues of the aforesaid patents; all inventions disclosed, set forth, and claimed in the patent applications and patents; as well as any and all Letters Patent or application for Letters Patent in all foreign countries, relating to any or all of such inventions disclosed, set forth, and claimed in the patent applications and patents, which Assignee may apply for or obtain; to be held and enjoyed by Assignee for its own use and enjoyment to the full end of the term or terms for which such Letters Patent may be granted, as fully and entirely as the same would have been held by Assignor had this assignment not been made, together with all claims for damages by reason of infringement occurring prior to, on or following the date hereof, with the right to sue for, and collect the same for, Assignee's own use and benefit and for the use and benefit of Assignee's successors and assigns. Further, and without limitation, Assignor assigns, sells and conveys to Assignee any and all rights of Assignor, express or implied, legal or equitable, in and to all licenses or use agreements relating to the above-described invention, including, without limitation, all income, royalties, damages, claims and payments now or hereafter due or payable with respect thereto. Assignor hereby authorizes Assignee to apply for patents of foreign countries for said inventions, and to claim all rights of priority without further authorization from Assignor; and Assignor hereby agrees to execute all papers useful in connection with said United States and foreign applications, and generally to do everything possible to aid Assignee, its successors, assigns and nominees, at their request and expense, in obtaining and enforcing patents for said inventions in all countries; and Assignor hereby requests the Commissioner of Patents and Trademarks to issue all patents granted for said inventions to Assignee, its successors and assigns. Assignor further agrees to execute all papers and perform such other acts, as Assignee may deem necessary to secure for Assignee or its designees the rights herein assigned.

IN WITNESS WHEREOF, Assignor has caused this instrument to be executed as of the date first written above.
