### ASSIGNMENT

This Assignment is made by **Eric Parker** of 1094 Orchard Grove, Geneva, Ohio, 44041, USA, and **Ralph Youngen** of 11818 Clara Way, Fairfax Station, Virginia, 22039, USA, (collectively, the Inventors), to **Atomized Cloud Technologies LLC**, an Ohio limited liability company, having its principal place of business at 1094 Orchard Grove, Geneva, Ohio, 44041, USA (the Assignee). Inventors believe that they are the original inventors of a METHOD AND SYSTEM FOR SECURING DATA (the Invention), which is at least partially described in the above-numbered patent applications filed on the above-indicated dates (the Applications). Inventors represent and warrant that they are the owners of the right, title, and interest in and to the Invention and the Applications as inventors, having full right and power to convey their entire interest, both legal and equitable, in this Assignment. Inventors further represent and warrant that the rights transferred in this Assignment are free of lien, encumbrance, or adverse claim.

For valuable consideration, receipt and sufficiency of which are hereby acknowledged, Inventors and Assignee agree as follows:

1. Inventors do hereby sell, assign, convey, and transfer to Assignee, its successors, assigns, nominees, or other legal representatives the full, exclusive, entire, worldwide rights, title, and interest in, to and under said Invention as described and claimed in any form or embodiment thereof, and in and to the Applications including in and to any application filed in this or any foreign country based thereon, including the right to file said foreign applications under the provisions of any international convention; also their entire right, title, and interest in and to any and all patents or reissues or extensions thereof to be obtained in this or any foreign country upon the Invention and any divisional, continuation, continuation-in-part, or substitute applications which may be filed upon the Invention in this or any foreign country; and in and to all income, royalties, damages, claims, and payments now or hereafter due or payable with respect thereto; and in and to all causes of action, either in law or in equity, for past, present, or future infringement based on the Invention; and Inventors hereby authorize and request the issuing authority to issue any and all patents on the Invention to said Assignee or its successors and assigns.
2. Inventors further agree to execute all divisional, continuing, substitute, improvement, extension, reissue, and other patent applications in this or any foreign country relating to the Invention or the Applications and to sign all other lawful papers and to perform all other lawful acts without further consideration, but without expense to Inventors, which Assignee may deem necessary or desirable to make this Assignment fully effective, including, by way of example but not of limitation, the following acts:
  - a. prompt execution of all lawful oaths, affidavits, and/or supplemental oaths required or deemed advisable by Assignee to further the prosecution of any application or applications for patents relating to the Invention; and
  - b. co-operation to the best of Inventors' ability in the execution of all lawful documents, the production of evidence, and the giving of testimony in interference, opposition, derivation, review, nullification, examination, re-examination, infringement, or other proceedings involving the Invention, the Applications, or any other applications or patents upon the Invention or the Applications.
3. The Applications were made or were authorized to be made by Inventors.
4. Inventors hereby authorize Assignee to insert into this Assignment the serial number and filing date of the Applications if not currently known.
