RECORDABLE PATENT ASSIGNMENT

This RECORDABLE PATENT ASSIGNMENT (this "Patent Assignment") is made as of February 16, 2015 (the "Effective Date") by and between BioSurface Engineering Technologies, Inc., a Delaware corporation ("Assignor") and Ferring International Center S.A., a Swiss Société Anonyme ("Assignee"). Each of Assignor and Assignee are referred to as a "Party" and together as the "Parties".

WHEREAS, Assignor and Assignee have entered into a certain Asset Purchase Agreement, dated as of February 16, 2015 (the "Purchase Agreement"), pursuant to which Assignee has acquired certain assets of Assignor and its Affiliates (as defined in the Purchase Agreement), including without limitation the Assigned Patent Rights (defined below); and

WHEREAS, Assignor wishes to confirm, memorialize and record the assignment of the Assigned Patent Rights to Assignee as set forth in the Purchase Agreement.

NOW, THEREFORE, in consideration of the mutual representations, warranties and covenants set forth herein and in the Purchase Agreement, and for certain monetary consideration and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the undersigned parties agree as follows:

1. Assignor on behalf of itself and its Affiliates does hereby confirm that it has irrevocably sold, transferred, assigned and delivered, and hereby does sell, transfer, assign and deliver unto Assignee, and Assignee hereby assumes and accepts, all of Assignor's and its Affiliates' worldwide rights, title, and interest in and to: (i) the patents listed on Annex A hereto, together with all registrations and applications for the foregoing; and all rights to request, apply for, file and register patent rights in any of the foregoing; (ii) all provisional applications, continuation and continuation-in-part applications, continued prosecution applications, and substitute and divisional applications claiming the benefit of the filing date of or priority to the foregoing; all patents of addition of the foregoing; all continued examinations, re-examinations, inter partes review and post-grant review certificates of the foregoing; all amendments, reissues, and extensions of the foregoing; all divisional, validations, supplementary perfection certifications and extensions of the foregoing; all patents or patent applications that claim priority to or from the foregoing; and all inventions claimed by any of the foregoing; (iii) all rights to claim priority to the foregoing under any of the International Convention for the Protection of Industrial Property ("Paris Convention"), the Patent Cooperation Treaty ("PCT"), and applicable bilateral or multilateral treaties; (v) all rights to request, apply for, file and register the foregoing; (vi) all patents issuing from any of the foregoing; (vii) all defenses relating to or arising from any of the foregoing, and all rights of action arising from the foregoing, including without limitation all claims for damages by reason of present, past and future infringement or violation of the foregoing and all present, past and future rights to sue and collect damages or seek injunctive relief for any such infringement or violation of the foregoing; and (viii) all income, royalties and any other payments now and hereafter due and/or payable to Assignor and its Affiliates in respect of the foregoing, in each case of (i) – (viii), to be held and enjoyed by Assignee for its own use and benefit and for its successors legal representatives and assigns as the same would have been held as fully and entirely by Assignor and its Affiliates had this assignment not been made (collectively, the "Assigned Patent Rights")

2. Assignor on behalf of itself and its Affiliates hereby authorizes and requests the competent authorities including without limitation an official of the United States Patent and Trademark Office, an official of any non-US governmental patent office and an official of any intergovernmental organization, whose duty is to issue patent registrations or other evidence or forms of intellectual property and/or industrial property protection on applications as aforesaid, to issue the same to the Assignee, its successors, legal representatives and assigns, in accordance with the terms of this Patent Assignment.

3. Assignor shall, and shall cause its Affiliates, and their respective officers, directors and employees to, promptly execute and deliver such documents, and do and perform such acts and things as Assignee, its successors, legal representatives and/or assigns may reasonably request to give effect to, document and record, perfect and enforce the assignment herein recited, including without limitation executing and delivering such other documents as may be required to give full effect to and to perfect the rights of Assignee, its successors, legal representatives and assigns under this Patent Assignment in and to the Assigned Patent Rights worldwide.

4. Assignor further agrees, at any time, upon the reasonable request of Assignee, its successors, legal representatives and/or assigns, to execute and deliver to Assignee, its successors, legal representatives and/or assigns, any additional applications for patent for said Assigned Patent Rights, or any part or parts thereof, including without limitation any provisional, utility, continuation, continuation-in-part, divisional, reissue, substitute, and extension applications to the foregoing; and all re-examination, inter partes, post-grant and opposition certifications or amendments or reissues of the foregoing and all patent applications claiming benefit of or priority from the foregoing; and all patents issues from the foregoing.

5. This Patent Assignment shall be binding upon and inure to the benefit of the parties hereto and their respective successors, legal representatives and assigns. This Patent Assignment and any claim, controversy, dispute or cause of action (whether in contract, tort or otherwise) based upon, arising out of or relating to this Patent Assignment shall be governed by and construed in accordance with the internal laws of the State of New York applicable to agreements made and to be performed entirely within the State of New York, without regard to the conflicts of laws principles thereof. This Patent Assignment may be executed in the original or by facsimile in any number of counterparts, each of which shall be deemed to be an original and all of which together shall constitute one and the same instrument.

[Signature page follows.]

The undersigned parties, by their authorized representatives, have executed this Recordable Patent Assignment effective as of the Effective Date:
