CONFIRMATORY ASSIGNMENT

THIS CONFIRMATORY PATENT ASSIGNMENT (the "Agreement"), is made and entered into this 6th day of March, 2015, by and between Conversant Intellectual Property Management Inc. ("Assignor") and GE Hybrid Technologies, LLC ("Assignee") (each a "Party" and collectively the "Parties").

WHEREAS, Assignor, prior to December 19, 2014, was the owner of all rights, title and interest in and to the United States and foreign patents and patent applications as listed on Schedule A (United States patent properties) and Schedule B (foreign patent properties) hereto (collectively the "Patents");

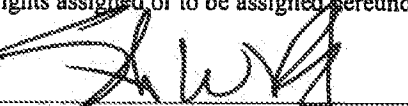

WHEREAS, Assignor and Assignee by a Confidential Patent Purchase Agreement (the "Purchase Agreement") dated December 19, 2014, by and between Assignor and Assignee, the terms of which are incorporated herein by reference, effected Assignor to sell, transfer, assign and set over unto Assignee and also effected Assignee to accept, all rights, title and interest in and to the Patents as specified in the "Executed Assignment" dated December 19, 2014, the content of which is herein incorporated by reference in its entirety, and in this Agreement, including any and all related patents and patent applications of the Patents, such as reissues, reexaminations, reviews, extensions, continuations, continuations in part, continuing prosecution applications, provisionals and divisions of the Patents, including any foreign counterparts thereof and patents and patent applications that claim priority to any of the foregoing (said related patents and patent applications shall be referred to as "Related Patent Assets");

NOW, THEREFORE, in consideration of the mutual covenants and agreements of the Parties and pursuant to the Purchase Agreement, including Section 5.2, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, it is hereby agreed and confirmed to be agreed as follows:

I. ASSIGNMENT

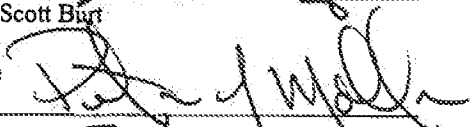

1. Subject to the terms, rights, and obligations set forth in the Purchase Agreement and the Third Party Encumbrances, as that term is defined in the Purchase Agreement, Assignor confirms having sold, transferred, assigned and set over to Assignee all rights, title and interest (for all countries but subject to rights, duties, and obligations enumerated or identified in the Purchase Agreement) in and to the Patents, the Related Patent Assets and all rights and privileges associated therewith.
2. Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks of the United States and any official of any country or countries foreign to the United States, whose duty is to issue patents or other evidence or forms of industrial property on applications as aforesaid, to issue the same to Assignee.
3. Assignor agrees that, whenever reasonably requested by Assignee, Assignor will take reasonable efforts to execute all papers, take all rightful oaths, and do all acts which may be reasonably necessary for vesting title to the Patents and the Related Patent Assets in Assignee.
4. Assignor hereby consents that a copy of this Agreement shall be deemed a full legal assignment of the Patents and the Related Patent Assets to Assignee.
5. All of the rights, title and interest in and to the Patents and the Related Patent Assets sold, transferred, assigned and set over to Assignee hereunder include (subject to rights, duties, and obligations enumerated or identified in the Purchase Agreement and the Third Party Encumbrances and exclude all income, royalties, and payments now or hereafter due or payable with respect thereto) all causes of action (whether in law or equity) and the right to sue, counterclaim, seek injunctions, settle disputes, and recover damages for the past, present and future infringement of the rights assigned or to be assigned hereunder.
