PATENT ASSIGNMENT

THIS ASSIGNMENT is made December 15, 2014 by RAINSTOR LIMITED, a private company limited by shares incorporated in England and Wales (company number 04354244) ("Assignor"), under the following circumstances:

WHEREAS, Assignor is the sole and exclusive owner of all right, title, and interest in and to the patents and patent applications listed on Schedule 1 attached hereto, including all registrations, applications for registration, and common law rights, where such common law rights are recognized, as well as the goodwill of the business associated therewith (the "Patents");

WHEREAS, Assignor, RainStor, Inc., a Delaware corporation, and Teradata Corporation, a Delaware corporation ("Assignee Parent"), are parties to an Asset Purchase Agreement dated as of December 15, 2014 (the "Asset Purchase Agreement"), pursuant to which, among other things, Assignee Parent is purchasing from Assignor, and Assignor is selling to Assignee Parent, substantially all of the assets of Assignor's business, including Assignor's entire right, title, and interest in and to the Patents;

WHEREAS, Assignor is executing and delivering this instrument pursuant to Section 3.2(a) of the Asset Purchase Agreement;

WHEREAS, as contemplated by Section 1.5 of the Asset Purchase Agreement, Assignee Parent assigned to TERADATA (UK) LIMITED, a private company limited by shares and incorporated in England and Wales (company number 06239196), and a Subsidiary (as defined in the Asset Purchase Agreement) of Assignee Parent ("Assignee"), certain of Assignee Parent's rights and obligations under the Asset Purchase Agreement; and

WHEREAS, Assignee desires to acquire the entire right, title and interest in and to the Patents, and Assignor is, at the instruction of Assignee Parent, assigning such right, title and interest in and to the Patents to Assignee.

NOW, THEREFORE, in consideration of the foregoing and for valuable consideration, the receipt and sufficiency of which hereby are acknowledged, Assignor hereby sells, assigns, transfers and sets over to Assignee, its successors and assigns, Assignor's entire right, title and interest in and to the Patents, together with the goodwill of the business connected with the use of and symbolized by the Patents throughout the world in perpetuity, and all income, royalties, damages and payments now or hereinafter due or payable with respect to the Patents and all causes of action (either in law or in equity) related to the Patents, including the right to sue, counterclaim and recover damages for past, present and future infringement of any of the Patents, and the exclusive right to apply for and maintain all registrations, renewals, and/or extensions thereof.

Assignor hereby agrees, without further payment or compensation by Assignee or its successors or assigns, to promptly execute all papers and to perform such other acts reasonably necessary to secure to Assignee, or its successors or assigns, the rights hereby transferred, in any jurisdiction in the world, including but not limited to Assignor's execution of assignments in

recordable form in each jurisdiction where patent applications are pending and registrations are issued.

Assignor hereby authorizes and requests that each national government or authority that has issued registrations for the Patents, or which holds applications for such registrations, record and memorialize this Assignment with regard to the Patents.

This Assignment shall be governed by and construed in accordance with the internal laws of England and Wales applicable to agreements made in and to be wholly performed in such jurisdiction without regard to the principles of conflicts of laws.
