## **CONFIRMATORY GLOBAL ASSIGNMENT**

This Assignment is made by Jay EVANS of Unit 109, 10425 173rd Street, Surrey British Columbia, V4N 5H3 Canada and Aaron MCKELLAR of Unit 109, 10425 173rd Street, Surrey British Columbia, V4N 5H3 Canada (hereinafter collectively, referred to as the "Assignors"), to Keirton Inc. a company having a place of business at Unit 109, 10425 173rd Street, Surrey British Columbia, V4N 5H3 Canada (hereinafter referred to as "Assignee").

WHEREAS, the Assignors have jointly invented a new and useful Invention entitled, "Blade Mechanism for a Plant Material Trimming Device", which is the subject matter of Canadian Patent Application No. 2818320;

WHEREAS, the Assignors believe themselves to be the original and first inventors of the Invention; and

WHEREAS, it was clearly intended that Assignee was to acquire by formal, recordable assignment the entire worldwide right, title and interest in and to said Invention, said applications, and any utility patent, design patent, industrial design, design right, utility model or petty patent that may be granted for said Invention in Canada, the United States or anywhere else throughout the world;

NOW, THEREFORE, in consideration of the sum of Ten Dollars (\$10.00 CAD) each and of other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, each of the Assignors hereby sells, assigns and transfers to Assignee, the entire worldwide right, title and interest in and to said Invention, said applications, and any utility patent, design patent, industrial design, design right, utility model or petty patent that may be granted for said Invention in the United States, Canada or anywhere else throughout the world, including the right to file foreign applications directly in the name of the Assignee and to claim for any such foreign applications any priority rights to which such applications are entitled under international conventions, treaties or otherwise.

Further, each of the Assignors agrees that during his employment with the Assignee, that upon request of the Assignee and at no expense to each of the Assignors, including out-of-pocket expenses and/or lost salary or wages as the case may be, he and his legal representative(s) and assigns will do all lawful acts, including the execution of papers and the giving of testimony, that may be necessary or desirable for obtaining, sustaining, reissuing or enforcing any utility patent, design patent, industrial design, design right, utility model or petty patent as may issue anywhere in the world for said Invention, and for perfecting, recording or maintaining the title of Assignee, its successors and assigns, to said Invention, said applications, and any utility patent, design patent, industrial design, design right, utility model or petty patent granted for said Invention in Canada, the United States or anywhere in the world. For greater certainty, each of the Assignors is not obligated to do any lawful acts for perfecting, recording or maintaining the title of Assignee, its successors and assigns, to said Invention, said applications, and any utility patent, design patent, industrial design, design right, utility model or petty patent granted for said Invention in Canada, the United States or anywhere in the world while not employed by the Assignee.

Each of the Assignors represents and warrants that he has not granted and will not grant to any other any rights inconsistent with the rights granted herein.

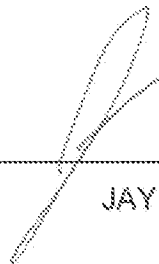

Each of the Assignors authorizes and requests the Commissioner of Patents of Canada, Director of Patents of the United States and of all foreign countries to issue any utility patent, design patent, industrial design, design right, utility model or petty patent granted for said Invention, whether on said applications or on any subsequently filed division, continuation, continuation-in-part or reissue applications, to Assignee, its successors and assigns, as the assignee of the entire undivided interest in said Invention.

This Assignment constitutes the entire assignment of the entire worldwide right, title and interest in and to said Invention, said applications, and any utility patent, design patent, industrial design, design right, utility model or petty patent that may be granted for said Invention in Canada, the United States or anywhere else throughout the world, and supercedes all previous oral and written communications and understandings.

IN WITNESS WHEREOF, each of the Assignors and Assignee have executed this Assignment on the date written hereinbelow.
