INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

This Intellectual Property Assignment Agreement (this “**Assignment**”) is effective as of February 23, 2015 (“**Effective Date**”), by and between BackJoy Orthotics, LLC, a Delaware limited liability Seller (“**Company**”), and Raft Global LLC, a Delaware limited liability Seller (“**Seller**”), pursuant to that certain Asset Purchase Agreement, dated as of February 23, 2015, by and among the Seller and the Seller (the “**Purchase Agreement**”), in which the Seller has agreed to sell, transfer and assign substantially all of its assets to the Buyer. Capitalized terms used but not otherwise defined in this Assignment have the meaning set forth in the Purchase Agreement.

In exchange for the consideration set forth in the Purchase Agreement and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

1. Definitions. In addition to terms defined elsewhere in this Assignment or in the Purchase Agreement, the following terms will have the following specified meanings:

(a) “Assigned Intellectual Property” means all Intellectual Property, including but not limited to all rights and interests in Intellectual Property listed on Exhibit A.

(b) “Domain Names” means domain names, uniform resource locators and other names and locators associated with the Internet, including applications and registrations therefor, including but not limited to the domain names listed on Exhibit A.

(c) “Intellectual Property” means all of the following in any jurisdiction throughout the world: (i) all inventions (whether patentable or unpatentable and whether or not reduced to practice), all improvements thereto, patent disclosures and all Patents; (ii) all Trademarks, Domain Names, and rights in telephone numbers, including all goodwill associated therewith, and all applications, registrations, and renewals in connection therewith; (iii) all works of authorship and other all copyrightable works, together with all translations, adaptations, derivations, and combinations thereof, and all copyrights, and all applications, registrations, and renewals in connection therewith; (iv) all mask works and all applications, registrations, and renewals in connection therewith; (v) all know-how, trade secrets, data and proprietary information, and confidential business information (including ideas, research and development, know-how, formulas, compositions, manufacturing and production processes and techniques, technical data, technology, designs, drawings, specifications, customer and supplier lists, pricing and cost information, and business and marketing plans and proposals); (vi) all computer programs (including any software implementation of algorithms, models and methodologies whether in source code or object code), databases and computations (including any data and collections of data), documentation (including user manuals and training materials) relating to any of the foregoing and the content and information contained in any web site; (vii) all material advertising and promotional materials; (viii) all rights of privacy or publicity; (ix) all other proprietary rights; (x) all copies and tangible embodiments of the foregoing (in whatever form or medium); and (xi) any rights to pursue, recover or retain damages, costs or attorneys’ fees for past, present and future infringement or misappropriation of any of the foregoing.

(d) “Patents” means applications and registrations for and issuances of patents, or other industrial rights or designs including any reissuances, continuations, continuations-in-part, revisions, extensions, and reexaminations thereof, and any other filings claiming priority to or serving as a basis for priority thereof, including but not limited to the patents listed on Exhibit A.

(e) "Trademarks" means trademarks, service marks, trade dress, logos, slogans, and design marks, trade names, fictitious and other business names, or brand names, together with all goodwill associated with any of the foregoing and the portion of the business associated therewith, and all applications and registrations therefor, including but not limited to the trademarks listed on Exhibit A.

2. Assignment. Seller hereby irrevocably assigns, conveys and transfers to Company, its successors and assigns, all of its right, title and interest in and to the Assigned Intellectual Property, and Seller acknowledges that Company owns and will own all such existing and future right, title and interest in and to the Assigned Intellectual Property, including, without limitation, the right to claim priority rights deriving from any of the foregoing and the right to sue for, settle and release past, present and future infringement of any of the foregoing. Without limiting the foregoing, Seller acknowledges that Company may use, sell, license, translate, copy, duplicate, record, broadcast, distribute, perform, display, add to, subtract from, arrange, rearrange, revise, modify, change, adapt and otherwise exploit the Assigned Intellectual Property in Company's sole and absolute discretion.

3. Waiver of Moral Rights. Seller hereby irrevocably waives all rights under all laws (of the United States and all other countries) now existing or hereafter permitted, with respect to any and all purposes for which the Assigned Intellectual Property may be used, including without limitation: (1) all rights under the United States Copyright Act, or any other country's copyright law, including but not limited to, any rights provided in 17 U.S.C. §§ 106 and 106A; and (2) any rights of attribution and integrity or any other "moral rights of authors" existing under statutory, common or any other law.

4. Domain Names. At the request of Company, Seller will promptly and properly complete and submit to the registrar for each of the Domain Names listed on Exhibit A, any and all instructions necessary to transfer ownership as registrant of the Domain Names listed on Exhibit A to Company or the entity designated by Company. Seller will promptly execute and deliver all necessary documents and take any action reasonably requested by Company to carry out the intentions of this Section.

5. Additional Actions. Seller will, at no additional cost or expense: (a) deliver all tangible embodiments of any Intellectual Property in Seller's possession or control; (b) promptly execute and deliver to Company any other documents necessary to complete the timely transfer of the Assigned Intellectual Property to Company; and (c) testify in any legal proceedings, sign all lawful papers, execute all divisional, continuing, reissue, reexamination and other applications, make all assignments and rightful oaths, and do all things reasonably required in order to protect, defend, enforce and convey the rights of Company, its successors, assigns, and nominees in the Assigned Intellectual Property in all countries (and Seller agrees that it will not execute any agreements inconsistent therewith). Without limiting the foregoing, Seller irrevocably designates and appoints Company and its duly authorized officers and agents as Seller's agent and attorney in fact to act for and on its behalf and instead of Seller, to execute and file any documents, applications or related filings and to do all other lawfully permitted acts in furtherance of the purposes set forth above in this paragraph, including the perfection of assignment and the prosecution and issuance of patents, patent applications, copyright applications and registrations, trademark applications and registrations, or other rights in connection with such Assigned Intellectual Property and improvements thereto with the same legal force and effect as if executed by Seller. Further, to the extent any of the rights, title and

interest in and to the Assigned Intellectual Property can neither be assigned nor licensed by Seller to Company, Seller hereby irrevocably waives and agrees never to assert such non-assignable and non-licensable right, title and interest against Company or any of Company's successors in interest. The designation and appointment of Company and its duly authorized officers and agents as its agent and attorney in fact will be deemed to be coupled with an interest and therefore irrevocable.

6. Irrevocable and Binding Assignment. Seller does not have the right to: (a) rescind any of the rights or waivers granted herein; (b) enjoin, restrain or otherwise hinder Company's exercise of any of the rights granted herein; or (c) enjoin, restrain or otherwise hinder, by court order or otherwise, the manufacture, use, sale, offer for sale, importation, marketing, license, translation, copying, duplication, recording, broadcasting, distribution, performance, display, addition to, subtraction from, arrangement, rearrangement, revision, modification, change, adaptation or other exploitation of the Assigned Intellectual Property.

7. General Provisions. This Assignment and the Purchase Agreement, together with the documents referenced herein and therein, and the attached Exhibit A constitute the entire agreement, and supersede any and all prior agreements, whether written or oral, with regard to the Assigned Intellectual Property. This Assignment shall be governed and controlled as to validity, enforcement, interpretation, construction, effect and in all other respects by the internal laws of the State of Delaware applicable to contracts made in that state. No amendment, modification or waiver of any of the provisions of this Assignment will be valid unless set forth in a written instrument signed by the party to be bound. The invalidity of any provision of this Assignment or portion of a provision shall not affect the validity of any other provision of this Assignment or the remaining portion of the applicable provision. In the event of a conflict between the terms and conditions of this Assignment and the terms and conditions of the Purchase Agreement, and except as otherwise specifically provided herein, the terms and conditions of the Purchase Agreement shall govern. This Assignment may be executed and delivered by facsimile signature or other electronic means and in multiple counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Any counterpart so delivered shall be deemed to have been duly and validly delivered and be valid and effective for all purposes. Notwithstanding anything to the contrary in this Assignment, nothing herein is intended to, nor shall it, extend, amplify, or otherwise alter the representations, warranties, covenants and obligations of the parties contained in the Purchase Agreement or the survival thereof.
