Exhibit C
PATENT RIGHTS ASSIGNMENT

This PATENT RIGHTS ASSIGNMENT is entered into as of the 24th day of April, 2014, by and between UNITED TECHNOLOGIES CORPORATION, a corporation organized and existing under the laws of the state of Delaware and having an office and place of business at One Financial Plaza, United Technologies Building, Hartford, CT 06101 ("UTC" or "Assignor") and BALLARD POWER SYSTEMS INC., a corporation organized and existing under the federal laws of Canada and having an office and place of business at 9000 Glenlyon Parkway, Burnaby, British Columbia V5J 5J9 ("Ballard" or "Assignee").

WHEREAS, as of the date of this Assignment, UTC and Ballard have entered into a TECHNOLOGY PORTFOLIO PURCHASE AGREEMENT dated April 24, 2014 ("Purchase Agreement") pursuant to which UTC agreed to sell certain patents and patent applications to Ballard. Assignment of these certain patents and patent applications from UTC to Ballard is a material component of transactions contemplated by the Purchase Agreement. UTC and Ballard agreed that UTC would assign and transfer the certain patents and patent applications, including technical data embodied in these patents and patent applications. Accordingly, Assignor desires to assign and transfer to Assignee the certain patents and patent applications, including technical data embodied in these patents and patent applications (Patent Rights) as set forth on Schedule A, which is attached to this Assignment.

NOW, THEREFORE, in exchange for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, ASSIGNOR hereby assigns and transfers unto the ASSIGNEE, the entire right, title and interest in and to the Patent Rights, including all inventions, applications and any and all letters patents which may be granted for the Patent Rights in the United States of America and its territorial possessions including any extensions or adjustments in term thereof and in any and all foreign countries, and in any and all divisions, reissues, reexaminations, continuations-in-part, and continuations thereof, including the right to file foreign applications directly in the name of ASSIGNEE and to claim priority rights deriving from the United States application to which the foreign applications are entitled by virtue of international convention, treaty or otherwise, and including the right to sue and collect damages for past and present infringement of the letters patent; the Patent Rights, inventions, applications and all letters patent on the inventions to be held and enjoyed by ASSIGNEE and its successors and assigns for their use and benefit and of their successors and assigns as fully and entirely as the same would have been held and enjoyed by ASSIGNOR had this assignment, transfer and sale not been made. ASSIGNOR hereby authorizes and requests the Commissioner of Patents and Trademarks to issue all letters patent on the inventions to ASSIGNEE. ASSIGNOR agrees to execute all instruments and documents required for the making and prosecution of applications for United States and foreign letters patent on the inventions, for litigation regarding the letters patent, or for the purpose of protecting title to the inventions or letters patent therefor.

ASSIGNOR agrees to execute and cause to be executed, at the request of the ASSIGNEE, all assignments, powers of attorney, and other papers as may be reasonably necessary to enable Assignee to obtain or maintain the Patent Rights.

This Assignment is effective as of April, 24, 2014

ASSIGNOR:
United Technologies Corp.

ASSIGNEE:
Ballard Power Systems Inc.

Date: April 24, 2014

Date: April 24, 2014

Name: Kelly A. Romano

Name: John Sheridan

Title: VP, Business Development

Title: President and chief executive officer
