PATENT

REEL: 035873 FRAME: 0883

ASSIGNMENT

Veronica M. Zsolcsak, residing in Newburyport, Massachusetts; **Micha Eizen**, residing in Lake Forest, California; **Thomas John William Bayes**, residing in Rothwell, Northamptonshire, United Kingdom; and **Ian Nicholson Whitehead**, residing in Concord, Massachusetts (referred to as "Assignors") have made an invention (the "Invention") set forth in an application for design patent of the United States, entitled:

INOLE

for which we filed a design letters patent application on **April 9, 2014** which bears U.S. Design Application Serial No. **29/487,518**; and

WHEREAS, **SCHAWBEL TECHNOLOGIES LLC**, a corporation organized under the laws of the Commonwealth of Massachusetts, whose post office address is 26 Crosby Drive, Bedford, MA 01730 (the "Assignee"), is desirous of acquiring the entire right, title, and interest in: the ornamental designs; the design applications for patent identified above; the right to file design applications for patent of the United States or other countries on the ornamental designs; any design application for patent of the United States or other countries claiming priority to these applications; any provisional or other right to recover damages, including royalties, for prior infringements of these applications; and any design patent of the United States or other countries that may be granted therefor or thereon.

NOW, THEREFORE, for good and sufficient consideration, the receipt of which is hereby acknowledged, and to the extent that the Assignor has not done so already via a prior agreement with the Assignee, or if the Assignor has already done so via a prior agreement with the Assignee then in confirmation of any obligation to do so in said prior agreement, the Assignor has sold, assigned, transferred, and set over, and by these presents does sell, assign, transfer, and set over, unto the Assignee, its successors, legal representatives, and assigns, the Assignor's entire right, title, and interest in:

- (a) the ornamental design(s);
- (b) the design application for patent identified above;
- (c) the right to file design applications for patent of the United States or other countries on the ornamental design(s), including all rights under the Paris Convention for the Protection of Industrial Property and under the Patent Cooperation Treaty;
- (d) any design application(s) for patent of the United States or other countries claiming the ornamental design(s);
- (e) any design application(s) for patent of the United States or other countries claiming priority to the design application for patent identified above or

any design application(s) for patent claiming the ornamental design(s), including any division(s), continuation(s), and continuation(s)-in-part; and

(f) any provisional or other right to recover damages, including royalties, for prior infringements of any design application for patent identified in the preceding paragraphs (b)-(e); and

(g) any design patent(s) of the United States or other countries that may be granted for or on any design application for patent identified in the preceding paragraphs (b) – (e), including any reissue(s) and extension(s) of said design patent(s).

The above-granted rights, titles, and interests are to be held and enjoyed by the Assignee, for its own use and behalf and the use and behalf of its successors, legal representatives, and assigns, as fully and entirely as the same would have been held and enjoyed by the Assignor had this sale and assignment not been made.

The Assignor hereby represents to the Assignee, its successors, legal representatives, and assigns, that, at the time of execution and delivery of these presents, or if applicable, at such time said prior agreement was executed, the Assignor is a lawful owner of an undivided interest in the entire right, title, and interest in and to the ornamental design(s), that the ornamental design(s) are unencumbered, except, if applicable, by obligation to assign in accordance with said prior agreement, and that the Assignor has good and full right and lawful authority to sell and convey the same in the manner set forth herein.

The Assignor hereby covenants and agrees to and with the Assignee, its successors, legal representatives, and assigns, that the Assignor will sign all papers and documents, take all lawful oaths, and do all acts necessary or required to be done in connection with any and all proceedings for the procurement, maintenance, enforcement and defense of the ornamental design(s), said design applications, and said design patents, including interference proceedings, without charge to the Assignee, its successors, legal representatives, and assigns, but at the cost and expense of the Assignee, its successors, legal representatives, and assigns.

The Assignor hereby requests the Commissioner of Patents to issue said design patents of the United States to the Assignee for the sole use and behalf of the Assignee, its successors, legal representatives, and assigns.
