ASSIGNMENT AGREEMENT

This Assignment and Assumption Agreement (this "Assignment") is entered into and made effective as of June 11, 2013, by and among TELEFLEX LIFE SCIENCES Company Number 509459, an unlimited company incorporated in Ireland (the "Assignee"), ULTIMATE MEDICAL PTY LTD ACN 065 992 903, a proprietary limited company formed under the laws of Australia ("Ultimate"), CHIMDEN MEDICAL PTY LTD ACN 007 127 022, a proprietary limited company formed under the laws of Australia ("Chimden"), UMEDAES LIMITED, a Hong Kong limited company formed under the laws of Hong Kong ("Umedaes" and, collectively with Ultimate and Chimden, the "Sellers"), and ULTIMATE MEDICAL HOLDINGS PTY LTD ACN 107 242 311, a proprietary limited company formed under the laws of Australia ("Holdings") (each of Ultimate, Chimden, Umedaes and Holdings are referred to hereinafter each as an "Assignor" and collectively, as the "Assignors"). All capitalized words and terms used in this Assignment and not defined herein shall have the respective meanings ascribed to them in the Asset Purchase Agreement (as hereafter defined).

WHEREAS, pursuant to an Asset Purchase Agreement entered into between LMA PacMed Pty Ltd ACN 096 142 675, a proprietary limited company formed under the laws of Australia (the "Buyer") and the Sellers and other parties of March 20, 2013 (the "Asset Purchase Agreement"), the Buyer desires to acquire Intellectual Property Assets from the Assignors as defined in the Asset Purchase Agreement, including, but not limited to, the patents, trademarks and applications set forth in attached Schedule A (hereinafter, individually and collectively, the "Intellectual Property Assets"); the Buyer has nominated the Assignee to take the acquisition of the Intellectual Property Assets; and the Assignors desire to effect such acquisition on the terms and conditions as further set forth in this Assignment.

NOW, THEREFORE, in consideration of the respective representations, warranties and agreements contained in the Asset Purchase Agreement and for good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, the parties agree as follows:

Section 1. The Assignment.

Subject to the terms and conditions of this Assignment, each Assignor hereby assigns, transfers and delegates to the Assignee, its legal representatives, successors and assigns, its entire right, title, interest, duties and obligations arising from, or relating to, the Intellectual Property Assets, including, but not limited to, any patent or trademark or other Intellectual Property rights, along with the goodwill associated therewith and the right to sue for past, present or future infringement, the right to claim domestic or foreign priority, and including any foreign counterparts, continuations, continuations-in-part, divisions, reissues, re-examinations or extensions thereof, and in and to any and all Letters Patent or registrations of any country which may be issued for the Intellectual Property Assets. The Assignee hereby accepts all such right, title and interest and assumes all of the duties and obligations of the Assignors arising in connection with, or relating to, the Intellectual Property Assets from and after the date hereof.

Section 2. Further Actions.

The Assignors hereby agree that each Assignor will not execute any writing or do any act whatsoever conflicting with these presents, and that each Assignor will, at any time upon request, without further or additional consideration but at the expense of the Assignee, execute such additional assignments and other writings, including recordation of such assignments or writings in any patent office in any country, and do such additional acts as said Assignee may deem necessary or desirable, to perfect the Assignee's enjoyment of this grant. The Assignors hereby agree that each Assignor will render all necessary assistance in making application for and obtaining original, divisional, continuations, continuations-in-part, reexamined, reissued, or extended Letters Patent of any country for the Intellectual Property Assets, and in enforcing any rights or action accruing as a result of such applications or patents, and by executing preliminary statements and other affidavits, it being understood that the foregoing covenant and agreement shall bind, and inure to the benefit of the assigns and legal representatives of the Assignors and the Assignee.

Section 3. Terms of the Asset Purchase Agreement.

The parties hereto acknowledge and agree that the representations, warranties, covenants, agreements and indemnities contained in the Asset Purchase Agreement shall not be superseded hereby but shall remain in full force and effect to the full extent provided therein. In the event of any conflict or inconsistency between the terms of the Asset Purchase Agreement and the terms hereof, the terms of the Asset Purchase Agreement shall govern.

Section 4. Miscellaneous.

(a) **Availability of Equitable Remedies.** Since a breach of the provisions of this Assignment could not adequately be compensated by money damages, any party shall be entitled, either before or after the date of this Assignment, in addition to any other right or remedy available to it, to an injunction restraining such breach or a threatened breach and to specific performance of any such provision of this Assignment and in either case no bond or other security shall be required in connection therewith, and the parties hereby consent to the issuance of such an injunction and to the ordering of specific performance.

(b) **Modification.** This Assignment may be modified only by a written instrument duly executed by each party.

(c) **Notices.** Any notice or other communication required or permitted to be given hereunder shall be in writing and shall be mailed by certified mail, return receipt requested or delivered against receipt to the party to whom it is to be given at the address of such party set forth in the preamble to this Assignment (or to such other address as the party shall have furnished in writing in accordance with the provisions of this Section 4(c)) with a copy to each of the other parties hereto. Any notice or other communication given by certified mail (or by such comparable method) shall be deemed given at the time of certification thereof (or comparable act), except for a notice changing a party's address which will be deemed given at the time of receipt thereof.

(d) Waiver. Any waiver by any party of a breach of any provision of this Assignment must be in writing and shall not operate as or be construed to be a waiver of any other breach of that provision or of any breach of any other provision of this Assignment. The failure of a party to insist upon strict adherence to any term of this Assignment on one or more occasions will not be considered a waiver or deprive that party of the right thereafter to insist upon strict adherence to that term or any other term of this Assignment.

(e) Assignment. Each Assignor may not assign its rights or delegate any of its duties under this Assignment without the prior written consent of Assignee, which shall not be unreasonably withheld. Any assignment in violation of this Section 4(e) shall be void and of no legal force or effect.

(f) No Third Party Beneficiaries. This Assignment does not create, and shall not be construed as creating, any rights enforceable by any person not a party to this Assignment.

(g) Severability. If any provision of this Assignment is invalid, illegal, or unenforceable, the balance of this Assignment shall remain in effect, and if any provision is inapplicable to any person or circumstance, it shall nevertheless remain applicable to all other persons and circumstances.

(h) Headings. The headings in this Assignment are solely for convenience of reference and shall be given no effect in the construction or interpretation of this Assignment.

(i) Governing law. Each party irrevocably submits to the exclusive jurisdiction of the courts of New South Wales, Australia to settle any disputes that may arise out of or in connection with this Assignment. The parties waive any objection on the ground of venue or on the ground that the proceedings have been brought in an inconvenient forum provided that this clause will be without prejudice to the right to bring proceedings in any other jurisdiction for the purposes of enforcement or execution of any judgment or other settlement in any other courts.

(j) Counterparts. This Assignment may be executed in any number of counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument binding on the parties.
