## ASSIGNMENT CONFIRMATION

By this confirmatory document, made this 17 day of January, 2009, by and between Ewa Herbst, residing in Edgewater, NJ 07020 (the "Assignor"), and Innovations Holdings, L.L.C., a New Jersey limited liability company having offices at Pennington, New Jersey 08534 ("Assignee"), the parties confirm the Assignment made the 24<sup>th</sup> day of December, 2008 between the parties as detailed below.

WHEREAS, Assignor assigned to the Assignee rights, titles, and interests in and to certain inventions set forth in certain United States patents more particularly identified on Schedule A attached hereto (the "Patents") and the inventions set forth in certain United States, foreign, and international patent applications also more particularly described on Schedule A attached hereto (the "Patent Applications");

WHEREAS, it was the intention of the parties that Assignor assign to Assignee the Assignor's entire right, title and interest in and to the Patents, the Patent Applications and the inventions set forth therein;

WHEREAS the Attachment A to the Assignment made the 24<sup>th</sup> day of December, 2008, mislabeled the titles of several of the assigned properties and the parties desire to correct the titles;

NOW THEREFORE, for the sum of \$100.00 and other good and valuable consideration, the receipt for and sufficiency of which is hereby acknowledged, and intending to be legally bound:

1. Assignment.

(a) Patents. Assignor does hereby assign, transfer and deliver to Assignee, and Assignee hereby receives and accepts from Assignor, the entire right, title and interest of Assignor in and throughout the United States of America, its territories and all foreign countries, in and to the Patents and the inventions and discoveries set forth therein and all reissues, reexaminations, substitutions, and extensions thereof and all United States and foreign patents which may be issued on such inventions, all such right, title and interest to be held and enjoyed by the Assignee to the full end of the term for which the Patents have been or will be granted, renewed, substituted, reexamined, extended or reissued, as fully and entirely as the same would have been held and enjoyed by the Assignor if this Assignment had not been made, and Assignor hereby assigns any and all claims and causes for action for infringement of such Patent(s) which have accrued up to and including the date of the December 24, 2008 Assignment, including all rights to recover damages and injunctive relief in respect to such infringement.

(b) Patent Applications. Assignor does hereby assign, transfer and deliver to Assignee, and Assignee hereby receives and accepts from Assignor, the entire right, title and interest of Assignor in and throughout the United States of America, its territories and all foreign countries, in and to the inventions and discoveries as set forth in the Patent Applications, and any and all other applications which may claim priority under United States law or international convention, including, but not limited to, non-provisionals, continuations, continuations-in-part, divisions, reissues, reexaminations, substitutions, or extensions thereof, and in and to any and all patents of the United States and foreign countries which may be issued for said inventions and discoveries. Assignor further authorizes Assignee to file patent

applications in any or all countries on any or all of said inventions and discoveries in the Assignor's name or in the name of the Assignee or otherwise as Assignee may deem advisable, under the international convention or otherwise.

2. Registration and Issuance of Patents. Assignor hereby authorizes and requests the Director of the United States Patent and Trademark Office and the empowered officials of all other governments to record Assignee as the owner of the Patents and the Patent Applications and to issue to Assignee, in lieu of Assignor, in accordance with this instrument, all future Letters Patent, notices and any other communications and documents bearing on the Patents or on patents based on the Patent Applications.
