ASSIGNMENT OF PATENTS AND PATENT APPLICATIONS

WHEREAS DRM Technologies, L.L.C., an Arizona limited liability company (the "Assignor"), owns rights to the patents and patent applications identified on Exhibit A attached hereto, and all related applications, continuations, continuations-in-part, divisions, reissues, utility model patents, laid-open applications and petty patents based on or claiming the priority of said patents or which may be granted therefrom, along with all extensions and renewals thereof, throughout the United States and all foreign countries throughout the world (collectively, the "Patents");

WHEREAS Digital Reg of Texas, L.L.C., a Texas limited liability company (the "Assignee"), is desirous of acquiring and perfecting its ownership of the entire right, title and interest in and to the Patents;

WHEREAS Assignor has previously assigned the Patents to Assignee on or about March 18, 2011, and this instrument is being executed to further effect such transfer and ensure that all right, title and interest has been and is now completely transferred to Assignee;

WHEREAS it is the intent of both parties to fully perfect and record complete ownership of the Patents and related rights in the Assignee;

NOW THEREFORE, in consideration of the sum of One Dollar (\$1.00) and other good and valuable consideration, the receipt of which is hereby acknowledged, Assignor hereby sells, assigns and transfers to Assignee the entire right, title and interest in and to the Patents, the same to be held and enjoyed by Assignee for its own use and enjoyment, and for the use and enjoyment of its successors, assigns and legal representatives, to the end of the terms for which the Patents have been granted, as fully and entirely as the same would have been held and enjoyed by Assignor if this assignment had not been made; together with all claims by Assignor for damages by reason of past infringement of the Patents with the right to sue for, and collect the same for Assignee's own use and benefit, and all associated rights to seek injunctive relief, and for the use and benefit of Assignee's successors, assigns and other legal representatives.

Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks of the United States, and any Official of any country or countries foreign to the United States, whose duty it is to issue patents or other evidence or forms of industrial property protection on applications as aforesaid, to issue the same to Assignee, its successors, assigns and legal representatives, in accordance with the terms of this instrument.

Assignor hereby covenants and agrees that it has full right to convey the entire interest herein assigned, and that Assignor has not executed, and will not execute, any agreement in conflict herewith.

Assignor further covenants and agrees that it will without undue delay execute all such papers as may be necessary to perfect the title to said inventions or improvements and Patents in Assignee, or its successors, assigns, nominees or legal representatives, and agrees to communicate to Assignee, or its successors, assigns, nominees or legal representatives all known facts respecting said inventions or improvements and Patents to testify in any legal proceedings, to sign all lawful papers, and generally to do all things necessary to aid Assignee or its successors, assigns, nominees or legal representatives to obtain and enforce for their own benefit patent protection for said inventions or improvements in any and all countries, all at the expense, however, of Assignee, or its successors, assigns, nominees or legal representatives.

IN TESTIMONY WHEREOF, the undersigned hereto sets his hand and seal this 14 day of June, 2011.
