The Assignor and the Assignee may be referred to individually as a "Party" or collectively as the "Parties."

RECITALS

WHEREAS, the Assignor is the owner of certain new and useful designs and inventions (collectively, the "Inventions");

WHEREAS, the Assignor is the owner of certain issued patents on the Inventions, which issued patents are listed on Exhibit A attached hereto and made a part hereof (collectively, the "Patents"); and

WHEREAS, the Assignor desires to transfer and assign to the Assignee the entire worldwide rights, title and interest in and to the Inventions and the Patents; and

WHEREAS, the Assignee desires to: (i) receive and assume from the Assignor the entire worldwide rights, title and interest in and to the Inventions and the Patents, (ii) take over prosecution of the patent applications, if any, and (iii) have the right to enforce any patent rights in the Patents.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

(1) The Assignor hereby sells, assigns and transfers to the Assignee, without limitation, the entire and exclusive right, title, and interest throughout the world in and to:

- (a) The Inventions and the Patents;
- (b) All improvements and modifications of the Inventions;

(c) All applications for patent or like protection on the Inventions, and improvements thereon, that have now been made or may in the future be made, including any continuations, divisionals, continuations-in-part, renewals, reissues, extensions or substitute applications, whether in the United States of America or in any other country or place anywhere in the world;

(d) All letters patent and like protection that have now been granted or may in the future be granted on said Inventions, and improvements thereon, whether in the United States of America or in any other country or place anywhere in the world;

(e) The right for the Assignee to file applications in its own name for patent and like protection for the Inventions in the United States of America and in any country or countries foreign to the United States of America;

(f) All international rights of priority associated with patent applications foreign to the United States of America; and

(g) All rights of action on account of past, present and future unauthorized use of the Inventions and for infringement of the Patents and like protection;

such right, title, and interest to be held and enjoyed by the Assignee to the full end of the term or terms for which any and all such Patents may be granted as fully and entirely as would have been held and enjoyed by the Assignor had this Assignment not been made.

(2) The Assignor hereby covenants and agrees:

(a) Upon the request of the Assignee, and without further consideration, to execute and deliver to the Assignee such other documents, and to take such other action, as may reasonably be necessary to give the Assignee, its successors and assigns, the full benefit of the Assignment and to maintain, preserve or enforce the rights of the Assignee transferred under the Assignment;

(b) Upon the request of the Assignee, and without further consideration, to execute any documents that legally may be required in connection with the filing, prosecution and maintenance of the Patents or any other applications for patent or like protection on the Inventions and improvements thereon;

(c) Upon the request of the Assignee, and without further consideration, to identify and communicate to the Assignee documents and information concerning the Inventions and the Patents that are within the Assignor's possession or control; and

(d) Upon the request of the Assignee, and at the Assignee's expense, to testify in any legal proceedings involving the maintenance, preservation or enforcement of the rights of the Assignee transferred under the Assignment.

(3) The Assignor hereby expressly authorizes and agrees that the Assignee may undertake procedures to record the transfer of the Patents to the Assignee with the United States Patent and Trademark Office and with other applicable agencies or government authorities and to terminate any Powers of Attorney previously granted by the Assignor with respect to the Patents.

(4) The Assignor hereby authorizes and requests the Commissioner of Patents and other applicable agencies or government authorities to issue any and all patents referred to above to the Assignee, as the assignee of the entire right, title and interest in and to the same, for the sole use and benefit of the Assignee, its successors and assigns.
