ASSIGNMENT

I, Timothy P. Barber and Lewis De Payne, having residence addresses as set forth below, invented "Method and System for Creation and Verification of Anonymous Digital Credentials", hereinafter called the "Invention." Preferred embodiments of said Invention are disclosed in United States Patent Application No. _____, filed _____, entitled "Method and System for Creation and Verification of Anonymous Digital Credentials," (I hereby authorize and request my attorneys at Holme Roberts & Owen, LLP to insert the filing date and application number of said application when known), bearing Attorney Docket No. 52275-10210, which application claims priority to and the benefit of United States Provisional Patent Application No. 61/018,755, filed January 3, 2008.

The Assignee, CredMe Inc., a Delaware corporation, having a principal place of business at 917 S. Lusk Street, Third Floor, Boise, Idaho, 83706, desires to secure the entire right, title and interest in said Invention.

For good and valuable consideration paid to me by the Assignee, the receipt and sufficiency of which I hereby acknowledge, we HEREBY ASSIGN TO THE ASSIGNEE:

The entire right, title and interest in said Invention in the above-identified United States patent application and in all divisions, continuations and continuations-in-part of said application, or reissues or extensions of Letters Patent or Patents granted thereon, and in all corresponding applications filed in countries foreign to the United States, and in all patents issuing thereon in the United States and Foreign countries.

The right to file foreign patent applications on said Invention in its own name, wherever such right may be legally exercised, including the right to claim the benefits of the International Convention for such applications.

I hereby authorize and request the United States Commissioner of Patents and Trademarks, and such Patent Office officials in foreign countries as are duly authorized by their patent laws to issue patents, to issue any and all patents on said Invention to the Assignee as the owner of the entire interest, for the sole use and behalf of the said Assignee, its successors, assigns and legal representatives.

I hereby agree, without further consideration and without expense, to sign all lawful papers and to perform all other lawful acts which the Assignee may request of me to make this Assignment fully effective, including, by way of example but not of limitation, the following:

Prompt execution of all original, divisional, continuation, substitute, reissue, and other United States and foreign patent applications on said Invention, and all lawful documents requested by the Assignee to further the prosecution of any of such patent applications.

Cooperation to the best of my ability in the execution of all lawful documents, the production of evidence, nullification, reissue, extension, or infringement proceedings involving said Invention.
