## ASSIGNMENT

WHEREAS, Max-Planck-Gesellschaft zur Förderung der Wissenschaften e.V., with its principal place of business located at Hofgartenstrasse 8, 80539 München, Germany, AND Ludwig-Maximilians-Universität München, with its principal place of business located at Geschwister-Scholl-Platz 1, 80539 München, Germany ("the Assignors") are the owners of the entire right, title and interest in and to US Patent No. 8,310,230 issued November 13, 2012, and of the invention therein described; and

WHEREAS, Universitaet Basel, with its principal place of business located at Vizerektorat Forschung, Petersgraben 35, CH-4003 Basel, Switzerland ("Assignee"), is desirous of acquiring the entire right, title and interest in and to said US Patent No. 8,310,230.

NOW, THEREFORE, in consideration of One Dollar (\$1.00) and of other good and valuable consideration, receipt of which is hereby acknowledged, the undersigned, intending to be legally bound, does hereby sell, assign and transfer to the assignee the entire right, title and interest, for the United States of America, its territories and possessions, and for all foreign countries, in said U.S. Patent No. 8,310,230, all divisions, continuations, extensions, reexaminations and reissues thereof, all rights to claim priority based thereon, all rights to file and prosecute foreign applications on said inventions, all letters patents and reissues thereof, issuing for said inventions in the United States of America and in any and all foreign countries, and the right to sue for and the remedies resulting from past and future infringement of the foregoing.

The parties authorize and request the Commissioner of Patents and Trademarks of the United States of America and the empowered officials of all other governments to transfer US Patent No. 8,310,230 to Assignee, as assignee of the entire right, title, and interest therein or otherwise as Assignee may direct.

The parties acknowledge and agree that after the execution of this Assignment, certain documents may need to be executed and delivered by Assignor to effectuate transfer of title to Assignee. Assignor hereby authorizes Assignee on behalf of Assignor and its predecessors in interest to act as Assignor's true and lawful attorney-in-fact in order to execute and deliver any such documents necessary or desirable to effectuate the assignment provided in this Assignment Agreement under the signing authority of Assignor as if such documentation was signed by Assignor on the date hereof.

To the extent that Assignee is not permitted by applicable law or regulation to execute assignment documents on behalf of Assignor, Assignor hereby agrees to, at the request of the Assignee and without additional consideration to the Assignor, promptly execute and deliver to the Assignee, such further instruments of conveyance, transfer, and assignment, and will take such other actions, as the Assignee may reasonably require to convey and deliver US Patent No. 8,310,230 and to give full effect to this Patent Assignment.

This Assignment Agreement may be executed in counterparts, each of which will be deemed an original, but all of which together constitute one and the same original. This Assignment Agreement may not be amended except by an instrument in writing signed by each of the parties hereto.

The rights and property herein conveyed by the undersigned are free and clear of any encumbrance.

EXECUTED under seal on September 21, 2015.
