ASSIGNMENT

FOR GOOD AND VALUABLE CONSIDERATION, the receipt, sufficiency, and adequacy of which are hereby acknowledged, the undersigned does hereby:

SELL, ASSIGN, AND TRANSFER to RSR Technologies, Inc. (the "Assignee"), having a place of business at 4828 Calvert St., Dallas, Texas 75247, USA, his entire right, title, and interest for the United States and all foreign countries in and to the United States patent application executed concurrently herewith, entitled "MAGNETIC SEPARATION OF ELECTROCHEMICAL CELL MATERIALS," such application and all continuing applications, divisional applications, continuation applications, continuation-in-part applications, substitute applications, renewal applications, reissue applications, international applications, foreign applications, and all other applications for patent which have been or shall be filed in the United States and all foreign countries on any inventions described in such application or improvements thereto; all original and reissued patents which have been or shall be issued in the United States and all foreign countries on any inventions described in such application or improvements thereto; and including the right to file international or foreign applications under the provisions of any convention or treaty and claim priority based on such application in the United States;

AUTHORIZE AND REQUEST the issuing authority to issue any and all United States and foreign patents granted on any inventions described in such application or improvements thereto to the Assignee;

WARRANT AND COVENANT that no assignment, grant, mortgage, license, or other agreement affecting the rights and property herein conveyed has been or will be made to others by the undersigned, and that the full right to convey the same as herein expressed is possessed by the undersigned;

COVENANT, when requested and at the expense of the Assignee, to carry out in good faith the intent and purpose of this assignment, the undersigned will execute all continuing applications, divisional applications, continuation applications, continuation-in-part applications, substitute applications, renewal applications, reissue applications, international applications, foreign applications, and all other applications for patent on any inventions described in such application or improvements thereto; execute all rightful oaths, declarations, assignments, powers of attorney, and other papers; communicate to the Assignee all facts known to the undersigned relating to any inventions described in such application or improvements thereto and the history thereof; and generally do everything possible which the Assignee shall consider desirable for vesting title to any inventions described in such application or improvements thereto in the Assignee, and for securing, maintaining, and enforcing proper patent protection for any inventions described in such application or improvements thereto;

TO BE BINDING on the heirs, assigns, representatives, and successors of the undersigned and extend to the successors, assigns, and nominees of the Assignee.
