WHEREAS, Assignor and Assignee are parties to the Asset Purchase Agreement, dated as of even date herewith (the "*Purchase Agreement*") pursuant to which Assignor has sold, and Assignee has purchased, certain assets of Assignor, including, without limitation, certain patents or ownership interest in certain patents (the "*Patents*");

WHEREAS, Assignor owns all right, title and interest in and to the Patents, including, without limitation, the patents and patent applications identified and set forth on Schedule A attached hereto; and

NOW, THEREFORE, for good and valuable consideration, the receipt, adequacy and sufficiency of which are hereby acknowledged, Assignor hereby agrees:

1. Assignor hereby irrevocably sells, transfers, assigns and conveys to Assignee, its successors, legal representatives and assigns, the entire right, title and interest in, to and under the Patents, in the United States and all countries throughout the world, including, without limitation, the inventions and improvements described therein, and all prior patent applications filed thereon and all non-provisional applications for patent that are converted from or claim priority to said applications, and in and to any and all direct and indirect divisions, continuations and continuations-in-part of said applications, and any and all patents in the United States and all foreign countries which may be granted therefor and thereon, and reissues, reexaminations, other rights from administrative proceedings and extensions of said patents, and all rights under the International Convention for the Protection of Industrial Property including all rights of priority, and all revisions thereof, to the full end of the term or terms for which the foregoing may be granted, renewed and/or extended, and counterparts thereof and all corresponding rights that are or may be secured under the laws of the United States or any foreign country, now or hereafter arising or in effect, for Assignee's own use and enjoyment, and for the use and enjoyment of Assignee's successors, assigns and other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment had not been made, together with all rights to collect royalties, products and proceeds in connection with any of the foregoing and all rights to sue for past, present or future infringement, misappropriation or other violation of the foregoing, and all rights to recover damages or lost profits in connection therewith, and all rights corresponding thereto throughout the world.

2. Assignor shall provide Assignee, its successors and assigns, and their legal representatives such information, documents and assistance as Assignee or any such other person or entity may reasonably request (including, without limitation, execution and delivery of any assignments, affidavits, declarations, oaths or other documents as may reasonably be required) in connection with effectuating and implementing this Assignment and to permit Assignee to be duly recorded as the registered owner of the Patents.
3. This Assignment shall be governed by and construed in accordance with the laws of the State of Delaware.
4. This Assignment is entered into pursuant to the Asset Purchase Agreement, to which reference is made for a further statement of the rights and obligations of Assignor and Assignee with respect to the Patents.
