CONFIRMATORY ASSIGNMENT

WHEREAS, **Lingvitae Holding AS**, at Norwegian public registration number 911887827 at Bloksbergveien 16, 3133 Husevund, Norway (hereafter, together with any successors, legal representatives or assigns thereof, called "Assignor") has assigned all right, title, and interest Assignor had in and to and all patents and patent applications identified on Exhibit A, including all patents, patent applications, foreign patents, foreign patent applications, continuations, continuations-in-part, divisionals, extensions, renewals, reissues and re-examinations related to all inventions thereof, including without limitation all rights to claim priority on the basis thereof (the "Patents");

AND WHEREAS, **Interquess Enterprises Ltd.**, at Building 1B, Phnom Penh Center, Phnom Penh, Cambodia (hereafter, together with any successors, legal representatives or assigns thereof, called "Assignee") acquired Assignor's entire right, title and interest in and to the Patents, including reissues and re-examinations, and Assignor has granted all substantial rights in and to the Patents to Assignee.

NOW, THEREFORE, effective on the date of execution set forth below, and in consideration of the promises and mutual covenants previously exchanged and for other good and valuable consideration, the Parties agree as follows:

1. **Ratification of Prior Assignment.** Assignor hereby ratifies and acknowledges its prior assignment to Assignee of the aforesaid Patents on May 29, 2013, which assignment transferred Assignor's entire right, title and interest in and to the Patents to the full end of the term for which the Patent is granted, as fully and entirely as the same would have been held by Assignor had this assignment not been made. The aforesaid prior assignment included the Assignor's right in and to all income, royalties, damages and payments now, in the past or hereafter due or payable which may be granted, and in and to all causes of action, and the right to sue, counterclaim, and recover for past, present and future infringement of the Patents, as fully and entirely as the same would have been held by Assignor had the prior assignment not been made. Assignor agreed not to challenge the validity and/or enforceability of the Patents or aid, abet, encourage, participate in, or induce any such challenge by a third party.

Assignor hereby covenants that it had the full right to convey the entire interest previously transferred, and that it has not executed, and will not execute, any agreement in conflict with the prior assignment.

Executed this 25 day of SEPT., 2015.
