Title of Invention: **SOLAR POWER BANK AND CHARGER**

As a below named and undersigned inventor, I hereby declare that:

This declaration is directed to:  the attached application, or  United States application or PCT international application number \_\_\_\_\_ filed on \_\_\_\_\_.

The above-identified application was made or authorized to be made by me.

I believe that I am the original inventor or an original joint inventor of a claimed invention in the application.

Whereas, I (hereinafter referred to as the "ASSIGNOR") have made certain inventions, improvements, and discoveries (herein referred to as the "Invention") disclosed in the above-identified patent application and further identified by the title of the Invention given above and the docket number provided in the footer section below;

Whereas, Dawan Global, LLC (hereinafter referred to as the "ASSIGNEE"), a limited liability company organized under the laws of New Jersey, having a place of business at 5 Etzkorn Ct., Lincroft, NJ 07738, as of the signing of this document, desires to acquire, and I desire to grant to the ASSIGNEE, my entire worldwide right, title, and interest in and to the Invention and in and to any and all patent applications and patents directed thereto;

Now, therefore, for good and valuable consideration, the receipt and sufficiency thereof being hereby acknowledged, I acknowledge my prior and ongoing obligation to sell, assign, and transfer unto the ASSIGNEE, the entire worldwide right, title, and interest for the United States and all foreign countries, in and to the Invention and improvements conceived thereof, and I hereby sell, assign, and transfer unto the ASSIGNEE, its successors and assigns, my entire worldwide right, title, and interest in and to the Invention, the above-identified United States patent application, and any and all other patent applications and patents for the Invention which may be applied for or granted therefore in the United States and in all foreign countries and jurisdictions, including all divisions, continuations, reissues, reexaminations, renewals, extensions, counterparts, substitutes, and derivatives thereof, and all rights of priority resulting from the filing of such applications and granting of such patents.
