PATENT ASSIGNMENT
(NUNC PRO TUNC)

This ASSIGNMENT, *nunc pro tunc*, effective March 31, 2015, is between Bryan Tapocik, a citizen of the United States of America, residing at Highland, California, U.S.A., having a correspondence address of 7045 Palm Avenue, Highland, CA, 92346 ("Assignor"), and IPB, Inc., a California corporation having its principal office at 7045 Palm Avenue, Highland, CA 92346 ("Assignee").

WHEREAS Assignor has invented certain new and useful improvements in Professional Dental Products as described in the Patent Applications listed on Exhibit A hereto (collectively "Smart Strip IP").

WHEREAS Assignor desires to assign to Assignee, and Assignee desires to acquire, all of Assignor's rights, title and interests in and to those inventions, patents and patent applications owned by Assignor related to the Professional Dental Products identified on Exhibit A as the Smart Strip IP.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Assignor and Assignee agree as follows:

1) Assignor hereby sells, assigns, transfers, and sets over to Assignee, its successors, assigns and legal representatives *nunc pro tunc* effective as of March 31, 2015, Assignor's entire rights, title and interests in and to the patents and patent applications of the Smart Strip IP and any and all inventions described and/or claimed therein and any and all improvements of said inventions, and any and all patents and like rights of exclusion (including extensions thereof) of any country that may be granted on or for said inventions or on any counterpart, divisional, continuing, reissue, re-examination, extension, provisional or other patent application based on and/or claiming priority to any of said Smart Strip IP, the same to be held and enjoyed by the Assignee for its own use and benefit, and for the use and benefit of its successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment had not been made, together with all causes of action (in law or equity), claims, demands and any other rights for, or arising from a past, present or future infringement of the Smart Strip IP, along with the right to sue for and collect any damages for its own use and benefit, and for the use and benefit of its successors, assigns or other legal representatives.

2) Additionally, or alternatively, Assignor hereby confirms assignment of the Smart Strip IP to Assignee that occurred prior to August 17, 2015 via operation of law based on legal or fiduciary obligations to Assignee that arise out of his role as owner and CEO of Assignee.

3) Assignor represents and warrants *nunc pro tunc* effective as of March 31, 2015 the following:

a) the Smart Strip IP identified on Exhibit A represents the totality of the patents and patent applications held by Assignor as of the Effective Date of this Assignment;

b) Assignor has not done or omitted to do anything that may cause any of the Smart Strip IP to lapse prematurely or be the subject of a compulsory license;

c) Assignor has not assigned or licensed any rights to the Smart Strip IP to any other party;

d) the Smart Strip IP is free from any security interest, option, mortgage, charge, lien or other encumbrance that would prevent Assignor from selling the Smart Strip IP; and

e) Assignor is not aware that any third party owns or claims any rights in the Smart Strip IP.

4) Assignor authorizes and requests the Commissioners of Patents of the United States, and any official of any country or countries foreign to the United States, whose duty it is to register patents, to record Assignee as the assignee and owner of the Smart Strip IP *nunc pro tunc* effective March 31, 2015, and to issue any and all Letters Patent of the United States, and any country or countries foreign, to Assignee.

5) By this covenant *nunc pro tunc* effective as of March 31, 2015, Assignor agrees at any time to:

a) execute or procure any further necessary assurances of title to said invention, including patents and patent applications;

b) execute and deliver any and all papers that may be necessary or desirable to perfect the title to said invention, including patents and patent applications that may be granted therefore, in Assignee, its successors, assigns or other legal representatives;

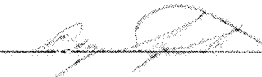

c) execute any additional or divisional applications for patents for said invention, or any part or parts thereof, and for the reissue of any Letters Patents to be granted therefore, and make all rightful oaths and do all lawful acts requisite for procuring the same or for aiding therein.

6) Assignor covenants and agrees *nunc pro tunc* effective as of August 16, 2015 that this Assignment and all of the terms hereof shall inure to the benefit of the successors, assigns, legal representatives, or nominees of Assignee, without further written or oral authorization from Assignor.
