CONFIRMATORY ASSIGNMENT

WHEREAS, I, Craig Swallow of South Yorkshire, United Kingdom (hereinafter "Assignor"), have invented certain new and useful improvements in **PERSONAL ELECTRONICS COMMUNICATIONS DEVICE**, for which a Design Patent Application was made on August 10, 2015 as US Design Patent Application No. 29/189472 claiming priority to GB Application No. GB 3014012 and GB 3011426, the Design Patent Application issuing as D515,527 on February 21, 2006.

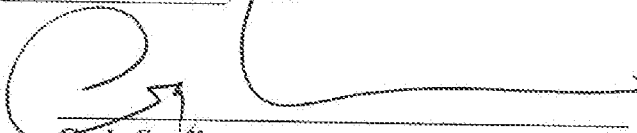

AND, WHEREAS, Connexion 2 Limited, an organization with an address of Unit 5 Carrera Court, Church Lane, Dinnington, Sheffield, South Yorkshire, United Kingdom S25 2RG (hereinafter "Assignee"), has already acquired an interest therein but presents this confirmatory assignment as proof thereof.

NOW, THEREFORE, To Whom It May Concern, be it known that for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor has assigned and by these presents does hereby sell, assign, transfer, and convey unto the Assignee, its successors and assigns, his entire right, title, and interest in and to the invention and application, including the right to sue for past infringements and any other prior occurring rights, provided any such rights exist, and in and to any and all domestic and foreign patent applications filed on the invention, and in and to any and all continuations, continuations-in-part, or divisions thereof, and in and to any and all Letters Patent of the United States of America, and all foreign countries or reissues thereof which may be granted therefor or thereon, for the full end of the term for which said Letters Patent may be granted, together with his right to claim the priority of said application in all foreign countries in accordance with the International Convention, the same to be held and enjoyed by said Assignee, its successors and assigns, as fully and entirely as the same would have been held and enjoyed by Assignor if this assignment and sale had not been made. Assignor further assigns to Assignee the right to claim entitlement and/or priority to any applications that entitlement or priority may be claimed for this or any later filed application. The assignment of the right to claim entitlement and/or priority is executed *nunc pro tunc* and is considered effective as of the filing date of the earliest application to which priority and/or entitlement is claimed.

Assignor further covenants and agrees that, at the time of the execution and delivery of these presents, Assignor possesses full title to the invention and application above-mentioned, and that he has the unencumbered right and authority to make this assignment.

Assignor further covenants and agrees, and likewise binds his heirs, legal representatives and assigns, to promptly communicate to said Assignee or its representatives any facts known to him relating to said invention, to testify in any interference or legal proceedings involving said invention, to execute any additional papers which may be requested to confirm the right of the Assignee, its representatives, successors and assigns to secure patent or similar protection for the said invention in all countries and to vest in the Assignee complete title to the said invention and Letters Patent, without further compensation, but at the expense of said Assignee, its successors, assigns and other legal representatives.

Executed this 12th day of November, 2015.
