ASSIGNMENT

For good and valuable consideration, the receipt of which is hereby acknowledged, Michael A. Jones ("Assignor"), does hereby assign and transfer unto Pneumatic Processing Technologies, LLC, a Louisiana limited liability company, having a business address at 1615 Poydras Street, Suite 1280, New Orleans, LA 70112 ("Assignee"), and unto its successors, assigns and legal representatives, the entire right, title and interest to a certain invention entitled "Gas Ratios for Production of High Quality Activated Carbon" described, illustrated and filed in the U.S. Patent and Trademark Office as Provisional Patent Application Serial No. 61/508,929, on July 18, 2011, together with the entire right, title and interest in and to said Application, and in and to any nonprovisional, division, extension, continuation, continuation-in-part, or reissue thereof.

Assignor also hereby assigns and transfers unto Assignee the entire right, title and interest in and to said inventions as described and claimed in any application made in all countries foreign to the United States of America, including all rights under any and all international conventions and treaties in respect of said inventions in foreign countries; Assignor further authorizes Assignee to apply for patents in foreign countries directly in its own name, and to claim the priority of the filing date of said U.S. Patent Application under the provisions of any and all international conventions and treaties.

Assignor hereby authorizes and requests the Commissioner of Patents of the United States of America, and the equivalent official of any Patent Office in another country, to issue further Letters Patents based on any division, extension, continuation, continuation-in-part, or reissue of the U.S. Patent Application to Assignee for the sole use and benefit of said Assignee, its successors, assigns and legal representatives, to the full end of the term for which said Letters Patents may be granted, the same as they would have been held and enjoyed by Assignor had this assignment not been made, and Assignor hereby authorizes and requests the equivalent authorities in foreign countries to issue the patents of their respective countries to Assignee.
