PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT ("Assignment"), effective as of November 2A, 2015 ("Effective Date"), is by and among General Electric Company and GE Intelligent Platforms, Inc. (each an "Assignor" and together the "Assignors") and GE Intelligent Platforms Embedded Systems, Inc., a corporation organized and existing under the laws of the State of Delaware ("Assignee").

WHEREAS, Assignee desires to acquire each Assignor's entire right, title and interest in and to the United States patents and patent applications set forth on Schedule A hereto and the foreign patents and patent applications set forth on Schedule B hereto (collectively, the "Patents"); and

WHEREAS, each Assignor is willing to assign to Assignee its entire right, title and interest in and to such patents and patent applications in accordance with the terms and conditions of this Assignment.

NOW, THEREFORE, in consideration of \$1, the mutual covenants and agreements set forth below, and for other good and valuable consideration, the sufficiency and receipt of which is hereby acknowledged, and intending to be legally bound hereby, the parties hereto agree as follows:

1. Each Assignor hereby irrevocably and unconditionally grants, conveys, sells, assigns and transfers to Assignee all of such Assignor's worldwide right, title and interest in and to the Patents and the inventions disclosed therein, together with the right to claim priority to any of the preceding, the same to be held and enjoyed by Assignee for its own use and enjoyment and the use and enjoyment of its successors, assigns and other legal representatives as fully and entirely as the same would have been held and enjoyed by such Assignor if this assignment and sale had not been made; together with all rights in and to all income, royalties, and license fees deriving from the Patents, and damages and payments now or hereafter due or payable with respect thereto, all causes of action (whether in law or in equity) with respect thereto, and the right to sue, counterclaim, and recover for past, present and future infringement of the rights assigned or to be assigned under this Assignment, as permitted under the applicable laws for any jurisdiction or country in which such claims may be asserted for the use and benefit of Assignee and its successors, assigns and other legal representatives.
2. This Assignment is binding upon, and inures to the benefit of, the parties hereto and their respective legal representatives, successors and assigns. It is understood that any finding of invalidity of one assignment as effected hereby shall not affect the assignment of other Patents. All questions concerning the construction, validity and interpretation of this Assignment and the performance of the obligations imposed by this Assignment shall be governed by, and construed in accordance with, the laws of the State of New York without regard to the choice of law principles thereof. Upon reasonable request by Assignee, each Assignor will execute additional documents and take other actions as may be necessary or desirable to record or memorialize the assignments of the Patents and other rights set forth herein, and to vest in Assignee such right, title, and interest in and to the Patents as sold, assigned and transferred to Assignee hereunder. No waiver, modification or change of any of the provisions of this Assignment shall be valid unless in writing and signed by the party against whom such claimed waiver, modification or change is sought to be enforced.

[THE REMAINDER OF THIS PAGE IS INTENTIONALLY LEFT BLANK]

IN WITNESS WHEREOF, the parties hereto, through their authorized representatives, have caused this Assignment to be duly executed and delivered as of the Effective Date.
