ASSIGNMENT

WHEREAS, WE, GEORGE V. ZUSMAN, of 12931 Kingsbridge, Houston, Texas 77077 and DAVID A. CORELLI, of 900 Underhill Road, East Aurora, New York 14052, are inventors of certain new and useful improvements in a VIBRATION SENSOR, for which we filed a provisional application for a patent in the United States on October 5, 2009 that has been assigned U.S. Patent Application No. 61/248,846 (the "Application"); and

WHEREAS, PCB PIEZOTRONICS, INC., a New York corporation, having a place of business at 3245 Walden Avenue, Depew, New York 14043 ("PCB"), is desirous of acquiring all right, title and interest in and to the subject invention and the Application and any and all applications and patents claiming priority therefrom.

NOW, THEREFORE, in consideration of the sum of One Dollar (\$1.00), and other good and valuable consideration to us in hand paid, the receipt and sufficiency of which is hereby acknowledged, we hereby ratify and confirm that we have assigned, sold, transferred, conveyed and set over, and do hereby assign, sell, transfer, convey and set over to PCB, free and clear of all liens, encumbrances and other restrictions or obligations, any and all of our right, title and interest in and to (i) the Application; (ii) all inventions described in the Application and all patent applications relating thereto which have been or shall be filed in the United States, its territorial possessions and/or any foreign countries; (iii) all applications claiming the benefit of the filing date or claiming priority, directly or indirectly, from any of the foregoing, including without limitation any and all non-provisional applications, divisional applications, continuation applications, continuation-in-part applications, reissue applications, reexaminations, and corresponding international, regional, national and other foreign applications; (iv) all rights, including without limitation all priority rights, under any international conventions, unions, agreements, acts and treaties; (v) all patents issuing or reissuing, directly or indirectly, from any of the foregoing; and (vi) all claims for damages or injunctive relief by reason of infringement of any of the foregoing, with the right to sue for past and future infringement and to collect damages for the same for PCB's own use and benefit and for the use and benefit of PCB's successors, assigns and other legal representatives (all of the foregoing hereafter referred to collectively as the "Patent Rights").

AND, WE do hereby authorize and request that any patents issued from any of the foregoing patent applications be issued to PCB, as the assignee of the entire right, title and interest thereto.

AND, WE do hereby agree to execute, upon request of PCB and at PCB's expense, any and all documents that PCB deems necessary or convenient to vest or record title in and to any of the Patent Rights in PCB, and to provide such other material, information or assistance related to the Patent Rights as PCB may deem necessary or convenient.

AND, WE do further understand, confirm and acknowledge that in executing this document, we are transferring our entire interest in and to the Patent Rights to PCB, and that the attorney(s) appointed in the Application also represent PCB and any other co-inventor(s) identified in the Application. We consent to such multiple representation for the purpose of prosecuting any of the foregoing patent applications, and do hereby authorize the attorney(s) to take all future instructions from PCB. We are unaware of any potential interest that we may have that differs from, or is adverse to, that of PCB with respect to the prosecution of the foregoing patent applications, and we further acknowledge that, prior to executing this document, we did not seek or obtain any legal advice from PCB's attorney(s) with respect to this Assignment and that we have been informed of our right to seek independent counsel of our own choosing and at our own personal expense.

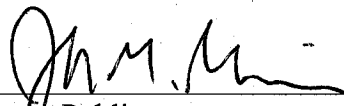

IN WITNESS WHEREOF, WE have executed this Assignment as of the 02 day of November, 2009.
