A S S I G N M E N T

We, Bryan Fisher, Catlin Mattheis, and Scott Lewis, residing in Huntington Beach, CA, San Luis Obispo, CA and Mountain View, CA, respectively, represent that we have invented improvements in a new and useful "PHOTOVOLTAIC ARRAY PERFORMANCE MONITORING SYSTEM" for which we have executed an application for Letters Patent of the United States of America on January 21, 2015 under Serial Number 13/131,904, which subsequently issued on February 10, 2015 as Patent Number 8,951,356.

Fracsun, LLC is a corporation organized and existing under the laws of California, has an address at 1320 Oceanaire Drive, San Luis Obispo, California, 93405, and desires to acquire the entire right, title and interest in and to the invention, application and letters patents to be issued thereon.

For valuable consideration, the receipt and legal sufficiency of which we acknowledge, we have sold and do hereby sell, assign, transfer and set over unto Fracsun, LLC, its successors and assigns, the entire right, title and interest in and to the invention and all improvements thereon, in and to the application for letters patent thereon, in and to applications pertaining to or based upon the invention and application, including divisional and continuing applications and continuations-in-part, and in and to any and all letters patents (including but not limited to U.S. Pat. No. 8,951,356) which may be granted and issued on the invention and applications, or any of them, in the United States of America, its territories and possessions, and in all countries foreign thereto, together with and including all priority rights based upon any and all applications in the United States of America covered by this Assignment.

We also agree that we will, at the request of Fracsun, LLC, execute any and all applications for letters patent for the invention, execute any and all other papers and documents and do all other and further lawful acts that Fracsun, LLC may deem necessary or desirable to obtain letters patent on the invention, to secure the grant of such letters patent and to protect and vest in Fracsun, LLC the undivided interests in the right, title and interest in the invention, applications and letters patents.

We also authorize and empower Fracsun, LLC, its successors and assigns to apply for and obtain, in its or their own names, letters patent for the invention before competent International Authorities and in any and all countries foreign to the United States in which applications for letters patent can be so made or letters patent so obtained.

Signed at San Luis Obispo, CA Jan 11, 2016
