PATENT AND IP ASSIGNMENT

Pursuant to the terms of that certain Asset Purchase and Contribution Agreement dated January 22, 2016 (the "APA") by and between KIOP Holdings, LLC, Katena Products, Inc., Sensor International, LLC, Sensor Medical Technology, LLC, and certain Members of Sensor International, and in consideration of the issuance of the Parent Units to Sensor International in exchange for the Contributed Assets, Sensor Medical Technology, LLC ("SMT"), a Delaware limited liability company, hereby irrevocably conveys, transfers and assigns to Katena Products, Inc., its successors and assigns, the following:

(1) the entire right, title and interest in the patents and patent applications in **Attachment A**, including the inventions claimed therein, and to each U.S. and foreign patent application and patent claiming priority to the patents and patent applications in **Attachment A** (collectively "the Patents");

(2) the entire right, title and interest in any continuation, continuation-in-part, divisional, re-examination, reissue or extension of the Patents;

(3) the right to enforce the Patents as fully and entirely as the same would have been held and enjoyed by the Assignors if this assignment had not been made; together with all claims by Assignors for damages by reason of past, present or future infringement or for provisional rights and including the right to sue for, and collect the same for its own use and benefit, and for the use and benefit of its successors, assigns, and other legal representatives;

(4) the priority right to the Patents provided by an International Convention; and

(5) the entire right, title and interest in any other Seller Intellectual Property (as such term is defined in the APA), including the domain names in **Attachment B**.

At any time or from time to time after the date of this agreement, for said considerations, SMT shall, upon the request of said assignee, its successors and assigns, cooperate with reasonable requests of said assignee, its successors and assigns, in any proceedings or transactions involving such applications or patents, including the preparation and execution of preliminary statements, giving and producing evidence, and performing any and all other acts necessary to obtain said Patents, both United States and foreign, and to vest all rights hereby conveyed in the assignee, its successors and assigns, whereby said Patents will be held and enjoyed by the said assignee, its successors and assigns, to the full end of the term for which said Patents will be granted, as fully and entirely as the same would have been held and enjoyed by the undersigned if this assignment had not been made with reasonable costs and expenses to be borne by the Assignee.

For purposes of clarity, the following patents are not subject to this assignment: U.S. Patent No. 6,851,808 and EP 1453416 (as effected in selected countries).

The preceding Assignment and each of its terms shall be effective upon the Closing under the APA.

WITNESS my hand this 22 day of January, 2016.

SENSOR MEDICAL TECHNOLOGY, LLC

By: 

Name: Greg Heacock

Title: Chief Executive Officer
