PATENT ASSIGNMENT

This Patent Assignment "US Patent Application # 14828465" is made and effective as of October 14th, 2015, by and between Leonard Haggarty, an individual (the "Assignor") and American Agriculture Research Group, Inc, a Washington corporation (the "Assignee"). The Assignor and the Assignee may be referred to individually as a "Party" or collectively as the "Parties."

RECITALS

WHEREAS, the Assignor is the sole and rightful owner of certain ideas, inventions, provisional patent applications, and any nonprovisional patent applications and patents stemming therefrom (collectively referred to as the "Patents") set forth in Exhibit A attached hereto; and

WHEREAS, the Assignor, as president and a shareholder of the Assignee, desires to assign all of its right, title, and interest in the Patents to the Assignee; and

WHEREAS, the Parties agree to the assignment of the Patents in conjunction with the execution of the Assignee's Shareholder Agreement, dated October 14th, 2015; and

WHEREAS, the Assignee desires to purchase or acquire the Assignor's right, title, and interest in and to the Patents; and

WHEREAS, the Assignor and Assignee are both duly authorized and capable of entering into this Assignment.

AGREEMENT

NOW, THEREFORE, for valuable consideration, the receipt of which is acknowledged, the Parties hereto agree as follows:

1. Assignment. The Assignor does hereby sell, assign, transfer and set over to Assignee all of its right, title, and interest in the Patents to Assignee for the entire term of the Patents and any reissues or extensions and for the entire terms of any patents, reissues, or extensions that may issue from foreign applications, divisions, continuations in whole or part or substitute applications filed claiming the benefit of the Patents. The right, title, and interest conveyed in this Assignment is to be held and enjoyed by Assignee and Assignee's successors as fully and exclusively as it would have been held and enjoyed by Assignor had this Assignment not been made.

The Assignor authorizes the United States Patent and Trademark Office and any other applicable jurisdictions outside the United States to issue any patents resulting from the patent application set forth in Exhibit A to Assignee as recipient of Assignor's right, title and interest therein.

The Assignor further agrees to (a) cooperate with Assignee in the prosecution of the patent application set forth in Exhibit A and foreign counterparts, (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer, and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patents and any and all applications and registrations for the invention in any and all countries.

2. Warranty. The Assignor warrants that Assignor is the legal owner of all right, title and interest in the Patents, that the Patents have not been previously pledge, assigned, or encumbered and that this Assignment does not infringe on the rights of any person.

3. Governing Law. This Assignment is governed by, and is to be construed in accordance with the laws of the State of Washington.

4. Entire Agreement. This Assignment constitutes the sole agreement of the parties and supersedes all oral negotiations and prior writings with respect to the subject matter hereof.

5. Severability. If one or more provisions of this Assignment are held to be unenforceable under applicable law, the Parties agree to renegotiate such provisions in good faith. If the Parties cannot reach a mutually agreeable and enforceable replacement for such provision, then (i) such provision will be excluded from this Assignment, (ii) the balance of the Assignment will be interpreted as if such provision were so excluded and (iii) the balance of the Assignment will be enforceable in accordance with its terms.

6. Advice of Counsel. Each Party acknowledges that, in executing this Assignment, such Party has had the opportunity to seek the advice of independent legal counsel, and has read and understood all of the terms and provisions of this Assignment. This Assignment will not be construed against any party be reason of the drafting or preparation hereof.

IN WITNESS WHEREOF, the Parties have executed or caused this Patent Assignment to be executed and delivered as of the day and year first above written.
