## ASSIGNMENT

This Assignment is made by Solaire Generation, LLC, a limited liability company duly organized under the laws of the State of Delaware, and having a principal place of business at 77 Rio Robles, San Jose, California 95134 (hereinafter the "Assignor");

WHEREAS, Assignor was converted from Solaire Generation, Inc., a corporation duly organized under the laws of the State of Delaware, to Solaire Generation, LLC, a limited liability company duly organized under the laws of the State of Delaware, on December 30, 2015, as shown by the certificate of conversion issued by the Secretary of State of the State of Delaware on Appendix A hereto (hereinafter the "Certificate of Change of Name");

WHEREAS, Assignor is the owner of all of the rights, title and interest in and to the patents and patent applications set forth on Schedule A hereto (hereinafter the "Listed Patents and Applications");

WHEREAS, SunPower Corporation, a corporation duly organized under and pursuant to the laws of the State of Delaware, and having a principal place of business at 77 Rio Robles, San Jose, California 95134 (hereinafter the "Assignee"), is desirous of acquiring the entire worldwide right, title and interest in and to said Listed Patents and Applications and the Assigned Patents and Applications (as defined below);

NOW, THEREFORE, for good and valuable consideration the receipt and adequacy of which is hereby acknowledged, said Assignor has sold, assigned, transferred and set over, and by this Assignment does sell, assign, transfer and set over, unto said Assignee, its successors, legal representatives and assigns, Assignor's interest in the entire worldwide right, title and interest in and to the above-mentioned Listed Patents and Applications, and in and to any and all divisionals, continuations, continuations-in-part and foreign counterparts of said Listed Patents and Applications, any patents granted for, on, or extending any patent applications of any of the foregoing, any other types of patents, including design patents, utility models, or other types of patents that derive from, extend, or claim priority based on any of any of the foregoing, and any and all reissues, reexaminations and extensions of any of the foregoing and any and all applications or patents to which any of the foregoing claim priority and all inventions described in any of the foregoing (collectively, the "Assigned Patents and Applications"), and all rights under international treaties relating to intellectual property including the Paris Convention for the Protection of Industrial Property and the Patent Cooperation Treaty, and to claim all rights of priority resulting from the filing of any of the foregoing, the same to be held and enjoyed by said Assignee, for its own use and behalf and the use and behalf of its successors, legal representatives and assigns, to the full end of the term or terms of any and all Assigned Patents and Applications for which patents may be granted, as fully and entirely as the same would have been held and enjoyed by the Assignor, had this sale and assignment not been made. Assignor grants to Assignee the right to register or record this Assignment in Assignee's name through an agent of

Assignee. Assignor does hereby sell, assign, transfer, and convey to Assignee, its successors, legal representatives, and assigns all claims for damages and all remedies arising out of any violation of the Assigned Patents and Applications assigned hereby that may have accrued prior to the date of assignment to Assignee, or may accrue hereafter including, but not limited to, the right to sue for, collect, and retain damages for past, present and future infringement of any of the said Assigned Patents and Applications before or after issuance.
