## PATENT ASSIGNMENT

This Patent Assignment is made and entered into this 1st day of June, 2014 by and between **Cameron International Corporation**, a Delaware corporation ("Assignor") and **GE Oil & Gas Compression Systems, LLC**, a Delaware limited liability company ("Assignee").

WHEREAS, Assignor and GE Oil & Gas, Inc. ("Purchaser") have entered into an Acquisition Agreement for the sale and purchase of certain assets (the "Acquisition Agreement");

WHEREAS, Assignee is an affiliate of Purchaser;

WHEREAS, Assignor is the owner of the inventions and U.S. patents and patent applications set forth on Schedule A and the inventions and foreign patents and patent applications set forth on Schedule B attached hereto (collectively, the "Patents");

WHEREAS, Assignee desires to purchase all of Assignor's right, title and interest in and to the Patents; and

WHEREAS, the execution and delivery of this Patent Assignment is a condition to the closing of the sale and purchase of the certain assets under the Acquisition Agreement.

NOW THEREFORE, for the consideration stated in the Acquisition Agreement, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor and Assignee agree as follows:

1. Assignor hereby assigns to Assignee: (i) all of Assignor's right, title and interest in and to the Patents, including any and all rights therein provided by international conventions and treaties, (ii) any and all legal actions and rights and remedies at law or in equity for past, present and future infringements, misappropriations, or other violations of the Patents, including the right to sue for, collect, and retain all damages, profits, proceeds, and all other remedies associated therewith, and (iii) any and all income, royalties, damages, and payments now or hereafter due or payable with respect to the Patents and all causes of action (either in law or in equity) relating thereto, for Assignee's own use and enjoyment and for the use and enjoyment of Assignee's successors, assigns, or other legal representatives as fully and entirely as the same would have been enjoyed by Assignor if this Patent Assignment has not been made (together, the "Assigned Rights").

2. Assignor hereby covenants that Assignor shall, at the cost and expense of Assignee, take all actions and execute all documents necessary or desirable to perfect the interest of Assignee in and to the Assigned Rights, and shall not enter into any agreement in conflict with this Patent Assignment.

3. This Patent Assignment may be executed in one or more counterparts, each of which when executed shall be deemed to be an original but all of which taken together shall constitute one and the same agreement. Delivery of an executed counterpart of a signature

page to this Patent Assignment by electronic mail or facsimile shall be as effective as delivery of a manually executed counterpart of this Patent Assignment.

4. No provision of this Patent Assignment may be amended or modified except by a written instrument signed by the parties hereto.

5. This Patent Assignment shall be governed in all respects, including as to validity, interpretation and effect, by the internal laws of the State of Texas without regard to choice of law principles. In the event of any dispute or disagreement between Assignee and Assignor arising out of or in connection with the interpretation or enforcement of the provisions of this Patent Assignment, Assignee and Assignor hereby (i) irrevocably submit to the jurisdiction of the courts of the State of Texas and the Federal courts of the United States of America located in Harris County, Texas; and (ii) waive, and agree not to assert, as a defense that it is not subject to personal jurisdiction in said courts or that the venue thereof may not be appropriate or that this Patent Assignment may not be interpreted by or enforced in or by said courts..
