EXHIBIT B

ASSIGNMENT

This Assignment is by and between Terence Bonita (Bonita), of Cebu, The Philippines, and David Prulhiere (Prulhiere), of Grants Pass, Oregon. This Assignment is effective as of the date of signing by the parties below. The parties agree as follows:

1. Bonita has invented certain inventions for Prulhiere relating to recognizing and extracting data from forms and the use of such data (The Inventions), some of which are as described in part in Exhibit C and Exhibit D to an Agreement between Bonita and Prulhiere, to which this Exhibit B is a part, including inventions entitled "DOCUMENT IMAGE RECOGNITION AND PARSING," and "HYBRID SEGMENTER AND A METHOD FOR SEGMENTATION IN OPTICAL CHARACTER RECOGNITION USING NEURAL NETWORKS."

2. Prulhiere desires to acquire all worldwide rights, title and interest in The Inventions and any improvements thereto.

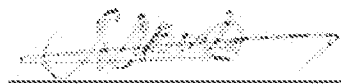

3. For good and valuable consideration, the receipt of which is hereby acknowledged, Bonita hereby irrevocably sells, assigns, and transfers to Prulhiere, the full and exclusive worldwide right, title and interest in and to The Inventions, and any improvements related thereto, to provisional patent applications, non-provisional patent applications and patent rights throughout the world, including foreign patent priority rights, continuation-in-part applications, continuing applications, reissued patents, the right to file and prosecute International Applications under the Patent Cooperation Treaty, and the right to file and prosecute applications under the European Patent Convention; The Inventions, patent applications and letters patent in this or any foreign country, and all corresponding provisional applications, non-provisional applications, divisions, continuations, continuations-in-part, reissues and extensions thereof, to be held and enjoyed by Prulhiere, for his own use and benefit, and for his successors and assigns to the full end of the term for which letters patent may be granted by the United States or any foreign country, as fully and entirely as the same would have been held by Bonita had this assignment and sale not been made. Bonita covenants that Bonita has full right so to do, and agrees that Bonita will communicate to Prulhiere, or his successors and assigns, any facts known to Bonita respecting The Inventions; and sign all lawful papers, execute all divisional, continuing and reissue applications, make all rightful oaths so as to aid Prulhiere, his successors and assigns to obtain and enforce proper patent protection for The Inventions in the United States and in any foreign country in which patent rights are sought.

4. Bonita confirms that, at the time The Inventions were made, Bonita was under an obligation to assign all rights in The Inventions to Prulhiere.

5. Bonita hereby grants the law firm of Klarquist Sparkman, LLP, the power to insert on this Assignment titles, serial numbers, filing dates, and other identification information for any patent applications to which this assignment applies. The patent application identification information includes: "Document Image Recognition and Parsing," 62/010,369, filed June 10, 2014; "Image Recognition and Parsing," 14/735,546, filed June 10, 2015; "Hybrid Segmenter and Segmentation in Optical Character Recognition Using Neural Networks," 62/010,375, filed June 10, 2014; and "Image Segmentation in Optical Character Recognition Using Neural Networks," 14/735,556, filed June 10, 2015.
