INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

This INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT ("**IP Assignment**"), dated as of August 31, 2015, is made by MAGNA INTERNATIONAL INC., an Ontario corporation ("**Parent**") and the subsidiaries of Parent listed on the signature pages hereto (together with Parent, collectively, the "**Seller**"), in favor of GRUPO ANTOLÍN-IRAUSA, S.A., a *sociedad anónima* organized under the laws of Spain ("**Buyer**"), the purchaser of certain assets of Seller pursuant to a Sale and Purchase Agreement among Buyer and Seller, dated as of April 16, 2015 (the "**Purchase Agreement**").

WHEREAS, under the terms of the Purchase Agreement, Seller has conveyed, transferred and assigned to Buyer, among other assets, certain intellectual property of Seller, and has agreed to execute and deliver this IP Assignment, for recording with the United States Patent and Trademark Office and corresponding entities or agencies in any applicable jurisdictions;

NOW THEREFORE, the parties agree as follows:

1. Assignment. For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Seller hereby irrevocably conveys, transfers and assigns to Buyer, and Buyer hereby accepts, all of Seller's right, title and interest in and to the following (the "**Assigned IP and License Agreement**"):

(a) the patents and patent applications set forth in Schedule 1 hereto and all issuances, divisions, continuations, continuations-in-part, reissues, extensions, reexaminations and renewals thereof (the "**Patents**");

(b) the registered trademarks and applications for registration set forth in Schedule 2 hereto (the "**Trademarks**");

(c) the license agreement set forth in Schedule 3 hereto (the "**License**");

(d) all rights of any kind whatsoever of Seller accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions and otherwise throughout the world;

(e) any and all royalties, fees, income, payments and other proceeds now or hereafter due or payable with respect to any and all of the foregoing; and

(f) any and all claims and causes of action with respect to any of the foregoing, whether accruing before, on or after the date hereof, including all rights to and claims for damages, restitution and injunctive and other legal and equitable relief for past, present and future infringement, misappropriation, violation, misuse, breach or default,

with the right but no obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

Notwithstanding the foregoing, to the extent that any intellectual property described in clause (a) – (f) above is (i) transferred to Buyer or a subsidiary of Buyer pursuant to the terms of any customary short-form acquisition agreement for a non-United States jurisdiction entered into pursuant to the Purchase Agreement (a “**Local Jurisdiction Acquisition Agreement**”) or (ii) owned by any subsidiary of Parent that will be acquired by Buyer or a subsidiary Buyer through a purchase of the equity interests of such entity (a “**Purchased Company**”), such intellectual property shall not be transferred pursuant to the terms of this IP Assignment but shall, in the case of clause (i), be transferred to Buyer or its applicable subsidiary as set forth in the terms of the applicable Local Jurisdiction Acquisition Agreement or, in the case of clause (ii), remain the intellectual property of such Purchased Company.

2. Recordation and Further Actions. Seller hereby authorizes the Commissioner for Patents in the United States Patent and Trademark Office and the officials of corresponding entities or agencies in any applicable jurisdictions to record and register this IP Assignment upon request by Buyer. Following the date hereof, upon Buyer's reasonable request, and at Buyer's sole cost and expense, Seller shall take such steps and actions, and provide such cooperation and assistance to Buyer and its successors, assigns and legal representatives, including the execution and delivery of any affidavits, declarations, oaths, exhibits, assignments, powers of attorney, or other documents, as may be reasonably necessary to effect, evidence or perfect the assignment of the Assigned Patents to Buyer, or any assignee or successor thereto.

3. Correction of Schedules. If, after the date hereof, the Parties mutually agree that any Patent, Trademark or License inadvertently was not listed on Schedule 1, 2 or 3, then such Patent shall be added to the corresponding Schedule 1, 2 or 3 and made subject to the provisions of this Agreement, provided that if any such item is identified more than one (1) year after the Closing Date, the item shall be added to the extent the Seller has the right to do so without paying any substantial compensation to a third party.

4. Counterparts. This IP Assignment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed to be one and the same agreement. A signed copy of this IP Assignment delivered by facsimile, e-mail or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this IP Assignment.

5. Successors and Assigns. This IP Assignment shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors and assigns.

6. Governing Law. This IP Assignment and any claim, controversy, dispute or cause of action (whether in contract, tort or otherwise) based upon, arising out of or relating to

this IP Assignment and the transactions contemplated hereby shall be governed by, and construed in accordance with, the laws of the United States and the State of New York, without giving effect to any choice or conflict of law provision or rule (whether of the State of New York or any other jurisdiction).
