## ASSIGNMENT

WHEREAS, David Hunts of Murrieta, California and Brian J. Smith of Aliso Viejo, California, Assignors, have invented a new and useful METHOD AND SYSTEM FOR PROVIDING ISOLATED DETAIL INFORMATION ABOUT STATIONS WHICH ARE SIMULTANEOUSLY ACTIVE IN AN IRRIGATION SYSTEM, for which Application Serial No. 13/490,659 was filed on June 7, 2012 for United States Letters Patent and was issued as United States Patent No. 8,924,891 on December 30, 2014; and

WHEREAS, Assignors believe themselves to be the original and first inventors of the invention disclosed and claimed in said application for Letters Patent and Issued Patent; and

WHEREAS, We Signature Control Systems, Inc., a California corporation, having a place of business at 16485 Laguna Canyon Rd., Irvine, California, 92618, Assignee, desires to acquire by formal, recordable assignment the entire right, title and interest in and to the invention, the application, and said Letters Patent and any other Patent granted for the invention in the United States and throughout the world;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignors hereby sell, assign and transfer to Assignee the entire right, title and interest in and to the invention, the application, and said Letters Patent and any other Patent granted for the invention in the United States and throughout the world, including the right to file foreign applications directly in the name of Assignee and to claim for any such foreign applications any priority rights to which such applications are entitled under international conventions, treaties or otherwise.

Further, each Assignor agrees that, upon request and without further compensation, but at no expense to the Assignor, he and his legal representatives and assigns

will perform all lawful acts, including the execution of papers and the giving of testimony, that might be necessary or desirable for obtaining, sustaining, reissuing or enforcing Letters Patent in the United States and throughout the world for the invention, and for perfecting, recording or maintaining the title of Assignee, its successors and assigns to the invention, the application, and any Letters Patent granted for the invention in the United States and throughout the world.

Assignor represents and warrants that he has not granted and will not grant to others any rights inconsistent with the rights granted by this Assignment.

Assignor authorizes and requests the Commissioner of Patents and Trademarks of the United States and of all foreign countries to issue any Letters Patent granted for the invention, whether on the application or on any subsequently filed division, continuation, continuation-in-part or reissue application, to Assignee, its successors and assigns, as the assignee of the entire interest in the invention.

IN WITNESS WHEREOF, Assignors have executed this Assignment.
