## ASSIGNMENT

Whereas, I, John William Mitchell, have solely invented "Radial Machine Safety Guard" as disclosed in the provisional application Radial Machine Safety Guard, and certain new and ornamental improvements in a "Radial Machine Safety Guard", for which I am contemporaneously filing a United States design patent application (Porter, Wright, Morris & Arthur Docket No. 4009495-195088) (collectively, the "GUARD INVENTIONS");

And whereas, Bevcorp LLC, having a mailing address of 4711 East 355th Street, Willoughby, OH USA 44094 ("ASSIGNEE") is desirous of acquiring the entire right, title and interest in, to and under the GUARD INVENTIONS, including the patent applications, any continuing applications, continuations-in-part, divisional applications, refiled or reissue applications made in the United States of America and all other Nations which may result from said inventions and information disclosed in said applications, and any and all Letters Patent of the United States and other Nations which may be issued therefrom;

Now, therefore, in accordance with my employment agreement and for other good and valuable consideration, the receipt of which is hereby acknowledged, I do hereby sell, assign and transfer to ASSIGNEE the entire and undivided right, title and interest in and to my GUARD INVENTIONS, said applications for patent, the inventions therein described, and all rights appurtenant thereto and in all our applications related thereto, including each of the following: the right to apply for any patent for said inventions in the United States of America and in any and all foreign countries, any and all other applications for patent on said inventions, in whatsoever countries, including all divisional, renewal, substitute and continuation applications based in whole or in part upon said inventions or upon said patent applications or related thereto; any and all patents that may issue thereon in the United States and foreign countries and any and all reissues, extensions, renewals, divisions, or continuations of patents granted for said inventions or upon said applications, to the full end of the term or terms for which said patents may be issued; and every priority or other right accorded by every international convention, treaty or agreement that is or may be predicated upon or arise from said inventions, applications and other applications or patents therefor, all to be held by ASSIGNEE, and its successors and assigns, all the same as I would have held and enjoyed had this Assignment not been made.

I hereby authorize and grant the right to ASSIGNEE to file and prosecute patent applications in any or all countries on all or any part of said inventions in my name or in the name of ASSIGNEE or otherwise, as ASSIGNEE may deem advisable under any international convention, treaty, or agreement or otherwise.

I hereby request and authorize the Commissioner of Patents and Trademarks of the United States and the empowered officials of all other countries to grant, issue and transfer any patents for said inventions to ASSIGNEE, as assignee of the entire right, title and interest therein, in accordance with this instrument of assignment.

I hereby represent and warrant that there are no outstanding rights or interest inconsistent with the rights and interests granted herein; I covenant that I will not execute, grant, or transfer any rights or interests inconsistent herewith, I bind myself, my heirs, executors, administrators and legal representatives to execute and deliver to ASSIGNEE, and its successors and assigns, any further documents or instruments and to perform any and all further acts that may be deemed necessary to enable it, and its successors and assigns, to file applications for patent for said inventions in any country in which it may elect to file such applications, and to vest in ASSIGNEE, and its successors and assigns, the title herein conveyed and intended to so be, and to enable such title to be recorded in the United States and each foreign country in which each such application may be filed so that any patent issued thereon shall be issued to vest in ASSIGNEE, and its successors and assigns; and I further covenant and agree, for myself and my executors, administrators and legal representatives, that I and they will, upon request, will communicate to ASSIGNEE, and its successors and assigns, any facts relating to said inventions and the history thereof, known to me or them and that I and they will testify as to the same in any proceeding, interference or litigation when requested to do so by to ASSIGNEE, and its successors and assigns.
