ASSIGNMENT OF RIGHTS IN INVENTION

BRADLEY B. CRITCHFIELD, an individual residing in Salt Lake County, State of Utah, ("Assignor") is the inventor of METHOD AND APPARATUS FOR AUTOMATED GENERATION AND SEWING OF A BORDER PATTERN (the "Invention"), to be described in a U.S. Patent Application to be filed in the U.S. Patent and Trademark Office, (the "Patent Application"). GRACEWOOD MANAGEMENT, INC., a Utah corporation with principal offices at 2225 South 3200 West, West Valley City, Utah 84119, ("Assignee") desires to acquire all rights in and to the Invention, the Patent Application and any and all Patents (and any reissues or extensions) that may be granted for the Invention, the Patent Application, or any divisional, continuation, continuation-in-part, or substitute application for the Patent Application.

Therefore, for valuable consideration, the receipt of which is acknowledged, Assignor assigns to Assignee One Hundred Percent (100%) of his right, title, and interest in the Invention and the Patent Application (as well as such rights in any divisions, continuations, continuations-in-part, or substitute applications) to Assignee for the entire term of the issued Patent and any reissues or extensions that may be granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisions, continuations, continuations-in-part, or substitute applications) filed claiming the benefit of the Patent Application.

Assignor authorizes the United States Patent and Trademark Office, as well as all foreign or international patent offices or agencies, to issue any Patents for the Invention or the Patent Application to Assignee according to the percentage interest indicated in this assignment. The right, title and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Patent Application and all foreign or international applications or counterparts for the Invention; (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to prosecute the Patent Application and any and all other applications for patent rights in United States or other countries and to maintain any and all Patents issued for the Invention in the United States and any and all other countries.
