PATENT ASSIGNMENT

This **PATENT ASSIGNMENT** (this "Assignment"), dated as of July 1, 2014 (the "Effective Date"), is by and between Johnson Controls Technology Company, a Michigan corporation with a principal place of business located at 915 East 32nd St., Holland, MI 49423 ("Assignor") and Visteon Global Technologies, Inc., a Michigan corporation with a principal place of business located at One Village Center Drive, Van Buren Township, MI 48111 ("Assignee"). All capitalized terms used, but not defined herein, shall have the meanings ascribed to such terms in the Purchase Agreement (defined herein below).

WHEREAS, Johnson Controls, Inc. ("JCI") and Visteon Corporation ("Visteon") have entered into that certain Purchase Agreement, dated as of January 12, 2014 (the "Purchase Agreement");

WHEREAS, pursuant to, and on the terms and conditions set forth in, the Purchase Agreement, JCI has agreed to, and agreed to cause the other Seller Entities to, sell, assign, transfer and convey to Visteon or to Affiliates of Visteon designated by Visteon all of JCI's and the other Seller Entities' right, title, and interest in and to the Patents included in the Business Intellectual Property, including the Patents set forth on Schedule A hereto (collectively, the "Assigned Patents");

WHEREAS, JCI has identified Assignor as the Seller Entity having the right to sell, assign, transfer and convey the Assigned Patents; and

WHEREAS, Visteon has designated Assignee to receive the sale, assignment, transfer and conveyance of all of Assignor's right, title, and interest in and to the Assigned Patents and Assignor is willing to sell, assign, transfer and convey such right, title, and interest to Assignee.

NOW, THEREFORE, in consideration of the premises and the mutual agreements and covenants set forth in the Purchase Agreement and hereinafter set forth, the parties hereto agree as follows:

1. Conveyance. Assignor does hereby sell, assign, transfer and convey to Assignee all of Assignor's right, title and interest in and to (a) the Assigned Patents, and (b) all benefits, privileges, causes of action, and remedies relating thereto throughout the world, including, without limitation, all of Assignor's rights to: (i) bring actions and recover damages for past, present and future infringement or other violation thereof, (ii) grant licenses or other interests therein, and (iii) any rights of priority in the Assigned Patents, including any international applications filed under the Patent Cooperation Treaty, pursuant and subject to the Purchase Agreement.

2. Recordation. Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks and any other applicable governmental entity or registrar (including any applicable foreign or international office or registrar) to record Assignee as the owner of the Assigned Patents, and to issue any and all Assigned Patents to Assignee, as assignee of Assignor's entire right, title and interest in, to, and under the same. Assignee shall have the right to record this Assignment with all applicable governmental authorities and registrars so as to perfect its ownership of the Assigned Patents.

3. No Modification. Nothing contained in this Assignment is intended to or shall be deemed to modify, alter, amend or otherwise change any of the rights or obligations of Assignor and Assignee and their respective Affiliates under the Purchase Agreement. In the event of any inconsistency between the terms of the Purchase Agreement and the terms hereof, the terms of the Purchase Agreement shall govern.

4. Miscellaneous. This Assignment is executed by the Assignor and the Assignee and shall be binding upon such parties and their respective successors and assigns, effective immediately upon the Closing Date. This Assignment shall be subject to all applicable provisions of Article X (General Provisions) of the Purchase Agreement.

[Signature Page Follows]

IN WITNESS WHEREOF, the undersigned have caused this Assignment to be executed
as of the date above first written.

ASSIGNOR:

JOHNSON CONTROLS TECHNOLOGY COMPANY

By: 

Name: Jose Ramos

Title: Vice President and Secretary

Acknowledged and Accepted:

ASSIGNEE:

VISTEON GLOBAL TECHNOLOGIES, INC.

By: _____

Name:

US2014026127A1	2013-02-21	1	METHOD FOR MONITORING THE PRESSURE IN A WHEEL AND MONITORING SYSTEM	A sensor module generates a momentary tire pressure signal, and a transmitting module transmits the momentary pressure information, a transmission module receives and processes the received signal, and includes a first predetermined pressure value and a second predetermined pressure value. The first predetermined pressure value being greater than the second predetermined pressure value. The method includes comparing the momentary pressure value to a target pressure value, the target pressure value corresponding to either the first predetermined pressure value or the second predetermined pressure value, selecting the first predetermined pressure value as the target pressure value when the momentary pressure is less than the second predetermined pressure value, and selecting the second predetermined pressure value as the target pressure value when the momentary pressure is less than the first predetermined pressure value.	Johnson Controls Technology Company	JOHNSON CONTROLS	Boj, Patrick	US1365777	2012-10-22		2010-04-24	2010-10-14	10-A-ASSIGNMENT, JOHNSON CONTROLS TECHNOLOGY COMPANY, MICHIGAN
EP2636393A1	2013-08-28	2	TELECOMMANDE D'UN VEHICULE, SYSTEME CORRESPONDANT A UN VEHICULE ET UNITÉ TELECOMMANDE	The invention relates to a remote control for a vehicle, in particular an electronic key for a vehicle, including a transmitter and a control member, wherein the transmitter is controlled by the control member and can be operated in a first transmission mode corresponding to the transmission of a first command signal having a first amplitude, and the second operation mode corresponding to the transmission of a second command signal having a second amplitude.				EP1770049	2011-05-29		2010-12-28	2010-10-21	2011-08-24, 177 REQUEST FOR EXAMINATION FILED, 2011-09-24 DESIGNATED CONTRACTING STATES,
US20130020706A1	2011-04-18	1	INDICATING DEVICE	The present invention relates to an indicating device, in particular for a motor vehicle, which comprises a dial, a first needle and a second needle, the first needle being rotated in front of the dial and about the rotational axis, the second needle being rotated behind the dial and about the rotational axis, the second needle comprising a first portion and a second portion, the first portion including at least one first marking element and one second marking element, the first marking element and the second marking element being tapered along the circumference of the dial, the indicating device comprising a means of illuminating the end portion of the second needle.	JOHNSON CONTROLS TECHNOLOGY COMPANY	JOHNSON CONTROLS	Dennis, Steven	US1363893	2011-07-18		2010-04-29	2010-10-18	
EP2628164A1	2011-11-21	1	PROCEDURE CONCERNANT DE L'EMISSIION DE PRESSIONS DE L'UNITÉ CENTRALE EQUIPANT UN VEHICULE AUTOMOBILE	The invention provides a method of transmitting information in wireless manner from a central processor unit of a vehicle, wherein the central processor unit is a control processor unit equipped with vehicle. The sensor transmits, for the data to be transmitted to the central processor unit, and a second location signal used by the central processor unit to identify the vehicle where from which the signal data is coming, in accordance with the invention, the emission power of the location signal is lower than the emission power of the data transmission signal, and/or the duration of the location signal is shorter than the duration of the data transmission signal, and/or the frequency of the location signal is lower than the frequency of the data transmission signal. The invention is applicable to systems for recording the pressure of the tire of a vehicle.				EP1701001	2011-01-14		2010-01-15		2011-11-21 REQUEST FOR EXAMINATION FILED, 2011-12-21 DESIGNATED CONTRACTING STATES, 2012-04-24 EXAMINATION OF THE EUROPEAN PATENT TO BE FILED, 2012-07-31 ANNOUNCEMENT OF INTENTION TO GRANT, 2012-08-23 GRANT, 2012-08-23 DESIGNATED CONTRACTING STATES,
US2012021278A1	2011-09-13	1	DISPLAY UNIT	The present invention relates to a display unit for a vehicle, wherein the display unit is configured for displaying a color information in dependence of a driving mode of a vehicle, wherein the driving mode information is referred to the current driving mode of the vehicle, wherein the color information comprises a colored symbol. The present invention further relates to a vehicle comprising such a display unit.	Johnson Controls Technology Company	JOHNSON CONTROLS	Decker, Andreas; Pedersen, Flem; Bergert, Steffen	US1350674	2010-10-01		2009-10-02		2011-05-06 ASSIGNMENT, JOHNSON CONTROLS TECHNOLOGY COMPANY, MICHIGAN
US20130015698A1	2011-01-28	1	DISPLAY DEVICE	A display device for a motor vehicle is proposed, wherein the display device has a first display area and a second display area, wherein the first display area is provided by way of a first display in the central area of a dial, wherein the second display area is designed so as to display a display information in an additional display area.	Johnson Controls Technology Company	JOHNSON CONTROLS	Sims, Manfred; Muhl, Nicolas; Hoffmann, Jochen; Ludwig, Bernd	US1325701	2010-02-18		2009-03-20	2009-10-15	2011-02-06 ASSIGNMENT, JOHNSON CONTROLS TECHNOLOGY COMPANY, MICHIGAN
US817501B2	2013-04-23	1	Method of calibrating a display device by means of an electrical control voltage of the display device	The present invention relates to a method of calibration of a display device by means of an electrical control voltage of the display device, wherein the calibration method comprises a measurement of an optical contrast of the display device and a calculation of an electrical control voltage value, the optical contrast measurement and the calculation of the electrical control voltage being carried out once during each calibration step, the optimization of the electrical control voltage being carried out by means of an electrical calibration step, the calibration method being carried out by means of an electrical calibration step, and by means of a calibration reference step, the calibration reference step being carried out once or several times during the calibration method, the approximation of the final value of the electrical control voltage due to the initial calibration step being higher than the approximation of the final value of the electrical control voltage due to the calibration reference step.	Johnson Controls Technology Company	JOHNSON CONTROLS	Bardot, Christophe	US1181879	2009-11-13		US2010013712A1	2008-11-14	2010-05-10 ASSIGNMENT, JOHNSON CONTROLS TECHNOLOGY COMPANY, MICHIGAN; 2010-01-20 ASSIGNMENT, JOHNSON CONTROLS TECHNOLOGY COMPANY, MICHIGAN
