PATENT ASSIGNMENT

This Patent Assignment (the "Assignment") is made by and between Bascom Research, LLC, a Virginia limited liability company (the "Assignor") and DSS Technology Management, Inc., a Delaware corporation, and its successors and assigns (collectively hereinafter the "Assignee").

For valuable consideration, the receipt and sufficiency of which is hereby acknowledged by Assignor, Assignor hereby assigns to Assignee its entire right, title, and interest in and to:

- a) Each of the patents and patent applications that are described in detail in Schedule A, annexed hereto and made a part hereof;
- b) The right to sue for past infringement of each of the patents and patent applications that are described in detail in Schedule A, and to collect all income, royalties, damages and payments now or hereafter due for all past, present, and future infringement of those patents and patent applications;
- c) Any and all applications, both United States and foreign, that have been or may be filed that claim the benefit of the patents and patent applications described in detail in Schedule A, including any and all United States and foreign utility patents and patent applications, including non-provisional, continuing (continuation, divisional, or continuation-in-part), reissue, and reexamination applications, utility models, and design registrations;
- d) Any and all inventions and improvements described in each of the patents and patent applications that are described in detail on Schedule A, and in all forms of intellectual and industrial property protection derivable therefrom, and that are derivable from any and all continuing applications (continuations, divisionals, or continuations-in-part), reissues, extensions, renewals and reexaminations of such patents and patent applications, including without limitation, patents, applications, utility models, inventor's certificates, and designs together with the right to file applications therefore, and including the right to claim the same priority rights from any previously filed applications under the International Agreement for the Protection of

Industrial Property, or any other international agreement, or the domestic laws of the country in which any such application is filed, as may be applicable;

- e) All such rights, title and interest to be held and enjoyed by the Assignee to the same extent as all such rights, title and interest would have been held and enjoyed by the Assignor had this Assignment not been made.

The Assignor hereby represents that Assignor has full right and authority to convey the entire interest herein assigned, and that Assignor has not executed, and will not execute, any agreement in conflict therewith.

The Assignor agrees to execute all papers necessary to perfect the recordation of this Assignment in connection with the patents and patent applications described in detail in Schedule A, and any non-provisional, continuing (continuation, divisional, or continuation-in-part), reissue, reexamination or corresponding applications thereof and also to execute separate assignments in connection with such applications as the Assignee may deem necessary or expedient to perfect the recordation of this Assignment.

The Assignor agrees to perform all affirmative acts at Assignee's request and expense that may be necessary to obtain or ensure a grant of a valid patent to the Assignee.

The Assignor agrees to execute all papers necessary in connection with any interference or patent enforcement action (judicial or otherwise) related to the patents and patent applications, or any non-provisional, continuing (continuation, divisional, or continuation-in-part), reissue or reexamination application thereof and to cooperate with the Assignee at Assignee's expense in every reasonable way possible in obtaining evidence and going forward with such interference or patent enforcement act.

The Assignor hereby grants the current patent practitioner(s) for each patent application or patent in the attached Schedule A the power to insert in this Assignment, including the attached Schedule A, any further information regarding the patents and patent application so identified in Schedule A that may be necessary or desirable in order to comply with the rules of the United States Patent and Trademark Office for recordation of this document.
