PATENT ASSIGNMENT

This PATENT ASSIGNMENT, made as of the 23 day of October 2014, from CUSTOM SENSOR AND TECHNOLOGIES INC, a [Missouri] corporation ("Assignor"), to NEOLITICS, a [Wyoming] corporation ("Assignee" and together with Assignor, the "Parties").

WHEREAS, Assignor is the owner of all right, title and interest in the patents and/or patent application(s) identified on Schedule A attached hereto (hereinafter collectively, the "Patents");

WHEREAS, Assignee is desirous of acquiring the Patents; and

WHEREAS, the Parties have entered into that certain Patent Purchase Agreement dated as of [10/23], 2014, pursuant to the Parties agreed to certain terms regarding the sale of the Patents;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor does hereby sell, transfer, convey and assign unto Assignee Assignor's entire right, title and interest in and to the Patents, in the United States and all jurisdictions outside the United States, including the right to apply for any letters patent in any and all such jurisdictions on any inventions and/or other subject matter contained in said Patents, and any and all other applications for letters patent on said inventions and/or other subject matter, in whatsoever countries, including all divisional, renewal, substitute, continuation and convention applications based in whole or in part upon said inventions and/or other subject matter or upon said applications, and any and all letters patent that may issue thereon, in any and all such jurisdictions, and any and all reissues, extensions, renewals, divisions or continuations of letters patent granted for said inventions and/or other subject matter upon said application, to the full end of the term or terms for which said letters patent may be issued, and every priority right that is or may be predicated upon or arise from said inventions and/or other subject matter, said applications and said letters patent, the same to be held and enjoyed by Assignee for its own use and benefit and for the use and benefit of its successors and assigns, to be used as fully and entirely as said rights would have been held and enjoyed by Assignor had this assignment not been made¹, together with all claims for damages by reason of past infringement of said Patents or misappropriation of any inventions contained in said Patents, with the right to sue and collect the same for its own use or for the use of its successors and assigns.]

Assignor hereby authorizes the Commissioner of Patents and Trademarks of the United States and other empowered officials of the United States Patent and Trademark Office and/or the appropriate empowered officials in relevant jurisdictions outside the United States to transfer all of the Patents to Assignee as assignee of the entire right, title and interest therein or otherwise as Assignee may direct, in accordance with this Patent Assignment, and to issue to Assignee or as Assignee may direct all letters patent and

¹ NOTE -- Is this applicable to the present situation? I.e., are there any such claims that Neolitics would like to acquire?

other items referred to above which may issue with respect to any patent application included in the Patents, in accordance with this Patent Assignment.

Assignor will take, or cause to be taken, all such other and further action, at its sole cost and expense, and will execute and deliver, or cause to be executed and delivered, to Assignee and its successors and assigns, all further documents, as may reasonably be requested by Assignee in order to effect the assignment contemplated hereby, including without limitation to enable Assignee and its successors and assigns to file applications for the inventions covered by the Patent in any country where it (or they) may elect to file such applications, and that may be necessary to vest in Assignee and its successors and assigns, the title herein conveyed or intended so to be, and to enable such title to be filed and recorded as necessary or appropriate with governmental or regulatory authorities, agencies or offices in the United States and other countries where such application or applications may be filed.

This Patent Assignment and all rights and obligations hereunder shall be binding upon the Assignor and its respective successors and assigns.
